

Excluded Investments

This document reflects the currently applicable exclusion lists under each exclusion category of the Danske Bank Exclusion Instruction. This means that companies/issuers mentioned on each of the lists with a few exemptions are non-investable for those products that apply the relevant exclusions corresponding to that list. Due to market conditions and client interests, some listed companies/countries may still be present in portfolios but are targeted for divestment. The exclusion lists set out in this document capture updates made with the bi-annual exclusion update in May 2025. While we strive to update the exclusion lists to always reflect the current uninvestable universe per the different categories, there may be situations where the published lists are not fully reflecting applicable exclusions as a result of e.g. operational implementation and market abuse requirements.

Introduction

Investment exclusions form an integral part of Danske Bank's approach to responsible investments. They serve to safeguard our customers' assets and enhance the risk-adjusted return on our investments, but also to reduce our investments' negative impact on society. Investment products managed by Danske Bank therefore to a large extent apply exclusions. The level of exclusions that apply varies depending on the specific strategy under management as we strive to design our investment product offering to cater for the different preferences of customers. The majority of investment products under management apply exclusions on sustainability risks. Investments products that are actively promoted and disclosing exclusions as an integral part of the investment strategy typically apply a combination exclusion that consider environmental, social and governance related aspects, including:

- [Enhanced Sustainability Standards](#)
- [Peat Fired Power Generation](#)
- [Tar Sands](#)
- [Thermal Coal](#)
- [Controversial weapons](#)
- [Tobacco](#)

For many of our managed funds, these base exclusions are supplemented by exclusions on [Pornography](#). Most Danske Invest funds marketed towards our Norwegian customers also have exclusions, [SPU Exclusions](#), replicating those of the Norwegian Bank (Statens Pensjons Utland). For certain investment products we apply an even more extended range of exclusions to meet the sustainability preferences of our clients, including exclusions relating to:

- [Extended Enhanced Sustainability Standards](#)
- [Alcohol](#)
- [Gambling](#)
- [Military equipment](#)
- [Fossil Fuel Transition Laggards](#)
- [Fossil fuels](#)
- [Paris Aligned Benchmark \(PAB\)](#)
- [Climate Transition Benchmark \(CTB\)](#)

Investment products making sustainable investments meet our restricted criteria defined for the so-called "principal adverse impact indicators" in respect to these investments. We refer to these restricted criteria as [PAI-Exclusions](#). For those investment products that invest partially in sustainable investments, the PAI-exclusions only apply to those investments. For investments products investing with the objective to invest only in sustainable investments, the PAI-Exclusions apply to the full product. There may be differentiation to this approach depending on the asset class.

The screening of companies and other issues covered by exclusions under the Exclusion Instruction is carried out at a bi-annual basis resulting in updates to the exclusion lists under each categoriy. For screening we primarily use external data sources, which are continuously assessed by Danske Bank's Responsible Investment team. Despite thorough due diligence and efforts to ensure data accuracy, completeness, and reliability, there may however still be a margin of error associated to the screening due to data inconsistencies. The exclusion lists cover direct investments in instruments (e.g. equity, bonds) issued by the respective companies and issues, this also includes sustainability labelled bonds issued by excluded issuers. Affiliation to an excluded issuer does in principle not trigger an exclusion of other issuers. Sovereign based exclusions can also capture other related issuers such as state-owned enterprises. The exclusion lists do not cover indirect exposures to the issuers gained via the use of derivatives. Specific investments covered by thermal coal exclusions or fossil fuel exclusions may be exempted from exclusions in accordance with the principles set out in the Exclusion Instruction. You will find an overview on these exemptions [here](#). Also, the Responsible Investment Committee may in extraordinary cases decide to allow for an investment product to stay invested in an investment otherwise excluded by the product in accordance with the Exclusion Instruction and principles set out on de minimis exposures. Further information on the exclusions mentioned in this document is available through the descriptions of the relevant categories, activities, criteria, scope and thresholds in the Danske Bank [Exclusion Instruction](#) under [Sustainability related disclosures \(danskebank.com\)](#).

Sustainability Risk Exclusions

Danske Bank applies sustainability risk exclusions for the majority of managed products as part of our commitments to consider and integrate sustainability risk considerations in our investment management processes. The sustainability risk exclusions capture involvement in activities deemed to expose significant risks to investments as based on an own proprietary model.

		Unity Bancorp, Inc.
Total excluded companies		25

Enhanced Sustainability Standards

The enhanced sustainability standards screening is Danske Bank's proprietary screening model that supports the exclusion of certain companies/issuers engaged in certain activities and conduct deemed harmful to society. The exclusions apply fully to all investment products and pension products manufactured within Danske Bank disclosing this to investors.

The enhanced screening is a multidimensional process assessing both environmental materiality as well as social materiality in order to promote adherence to UN Global Compact principles, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights and ILO conventions and other relevant environmental or social safeguards by its exclusions. The screening also seeks to capture certain other activities indicating weak sustainability practices (in particular) by addressing controversies and Danske Bank Position Statements as well as weak governance practices governance practices are addressed through the good governance test outlined below.

The Enhanced Sustainability Standards screening process currently consists of three sub-processes:

- 1) [Incident & Event-based Screening](#)
- 2) [Good Governance](#)
- 3) [Country Assessment](#)

Peat is organic fuel consisting of spongy material formed by the partial decomposition of organic matter, primarily plant material, in wetlands. Criteria for the exclusions are defined in the Exclusion Instruction.

Peat-fired power generation	Power generation
Company	x
Neova Oy	
Total excluded companies	1

Tar Sands

Tar sands, also known as oil sands, heavy oil, crude bitumen, or more technically bituminous sands, are a type of unconventional petroleum deposit. Tar sands are either loose sands or partially consolidated sandstone containing a naturally occurring mixture of sand, clay, and water, saturated with a dense and extremely viscous form of petroleum technically referred to as bitumen [or colloquially as tar due to its superficially similar appearance]. Criteria for the exclusions are defined in the Exclusion Instruction.

Fossil Fuel Transition Laggards

Publication of exclusion list pending.

Fossil Fuel

Fossil fuel, any of a class of hydrocarbon containing materials of biological origin occurring within Earth's crust that can be used as a source of energy. Fossil fuels include coal, petroleum, natural gas, oil shales, bitumens, tar sands, and heavy oils and the fossil fuel exclusions are further defined in the Exclusion Instruction.

Approved Exemptions for Fossil Fuel Exclusions

Current list of approved exemptions cases for the fossil fuel exclusion category:

Enel SpA
Exelon Corporation
Iberdrola SA
Orsted A/S
SSE Plc

EU Paris-aligned Benchmarks Exclusions (PAB)

Activity based exclusions referred to in Commission Delegated Regulation (EU) 2022/1818, Article 12(a)-12(g) as further defined the Exclusion Instruction.
