# *Executive summary: Steady progress in a challenging environment*

## Steady progress in a challenging environment

- The Nordic economies have held up relatively well so far
- Good lending activity in local currency to both retail and commercial customers at Banking Nordic
- Stable income y/y excl. one-offs despite challenging trading environment in Q1 2020
- Expenses down 4% q/q due primarily to lower staff costs; up 6% y/y due mainly to transformation costs, continued compliance remediation and the Estonia case
- Further post-model adjustments booked in Q3 to reflect clouded visibility, offsetting macro-driven model releases
- Net profit of 3.1 billion in the first nine months; ROE of 2.3%
- Net profit for 2020 now expected to be in the range of DKK 4.0-4.5 bn
- We still expect expenses to be around DKK 26 bn in 2021

## Better Bank transformation update

Redesign of our organisation into two business units

Execution on income initiatives and cost programme

Execution on compliance remediation and the Estonia case

Continued progress within product simplification

# Stable income y/y; significant impact from transformation costs and corona-related impairment charges

## Key points, 9M 2020 vs 9M 2019

- NII up 1% driven mainly by deposit effects
- Fee income down 1% due to lower remortgaging activity – 9M 2019 affected by Flexinvest Fri compensation
- Expenses up 6% due mainly to costs for transformation, compliance and the Estonia case
- Significant impairments, mainly in Q1, due to corona crisis effects and oil-related exposures

## Key points, Q3 2020 vs Q2 2020

- NII flat with deposit volumes and day effects compensating for lower deposit margins
- Fee income stable excluding one-offs in Q2 and Q3
- Trading income saw relatively high activity during the summer holiday period
- Expenses down 4%, primarily due to lower staff costs
- Impairments mainly against legacy oil-related exposure and single-name exposures in Sweden

## NII: Up 3% y/y adjusted for FX effects due to higher volumes and better margins; stable q/q despite lower lending volumes

### Key points

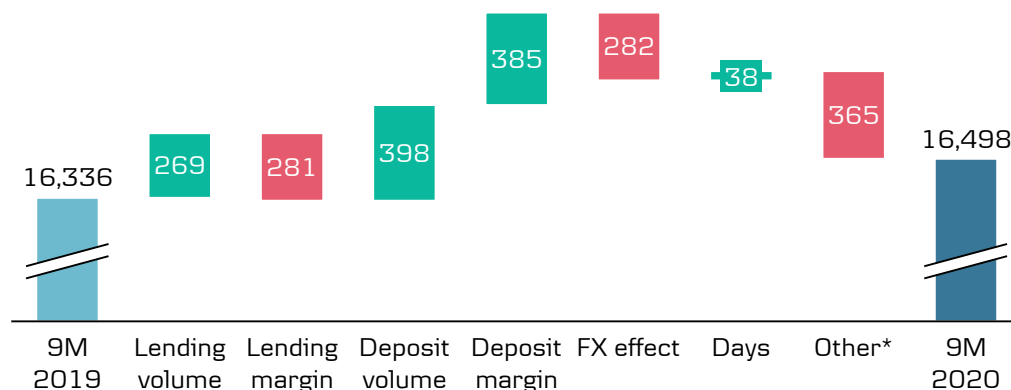

#### Y/Y

- NII up 1% (up 3% adjusted for FX) driven by volume growth and higher deposit margins, which benefit from higher xIBOR fixings vs central bank rates
- Significant negative FX impact as especially NOK exchange rate fell sharply

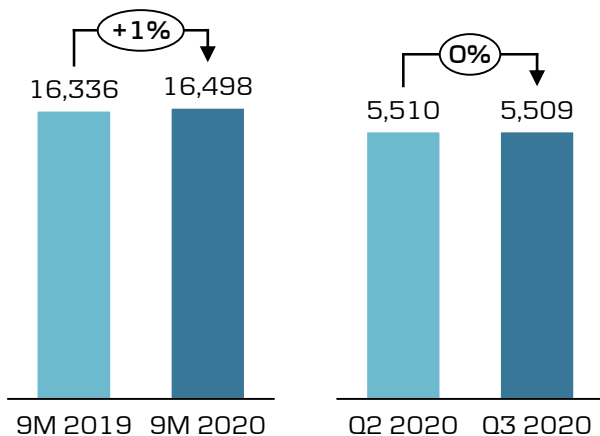

#### Q/Q

- NII flat as higher deposit volumes were offset by lower deposit margins, affected by a normalisation of xIBOR fixings vs central bank rates

### Change in net interest income, y/y (DKK m)

### Group net interest income (DKK m)

### Change in net interest income, q/q (DKK m)

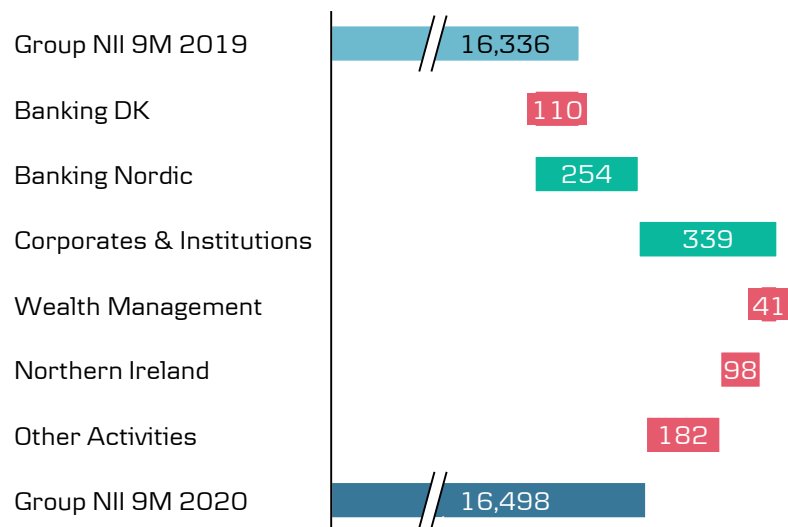

# NII (cont'd): Lending growth of 4% in local currency at Banking Nordic; continued lending margin pressure at Banking DK

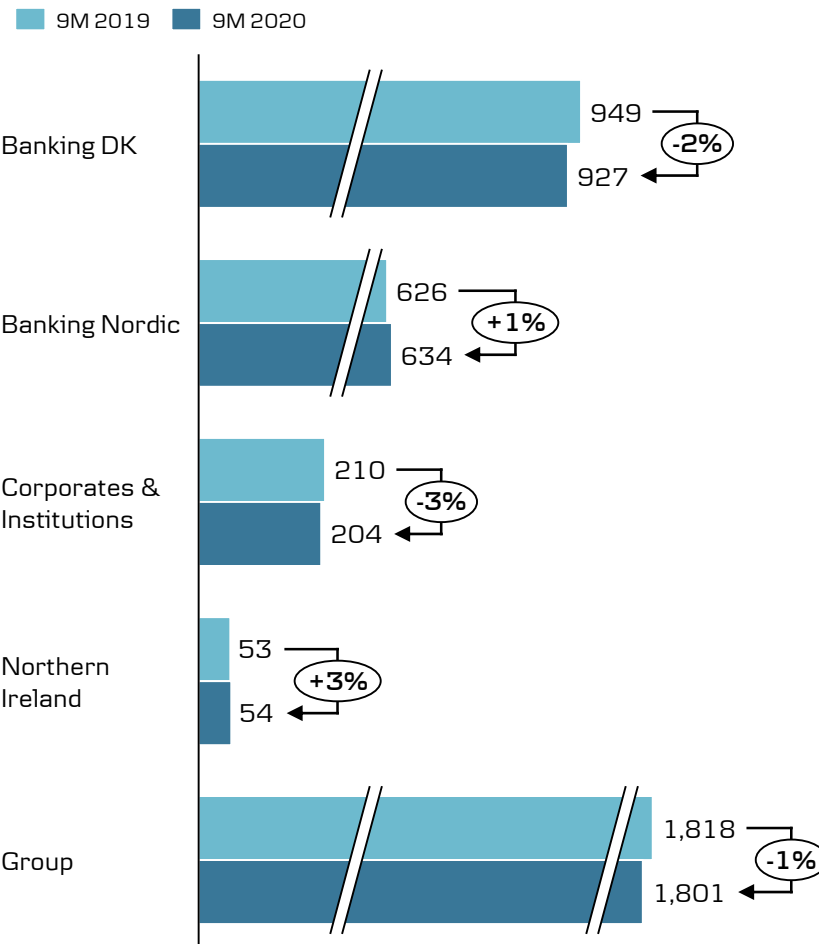

## Key points

- Banking Nordic lending up 1% y/y (up 4% in local currency) with local currency lending growth in all countries and higher lending margin
- Banking DK lending down 2% y/y due to lower demand for commercial credits amid the corona crisis and squeezed lending margins; positive deposit margin effect
- C&I lending down 3% y/y due to lower collateral values; up 1% in General Banking as clients' utilisation of committed facilities declined in Q3

## Change in NII by business unit (DKK m)

## Lending volumes and development\* (DKK bn)

\* Business unit lending is before impairments. Group lending is after impairments.

## Fee income: In line with 9M 2019 as higher pension and investment fees were offset primarily by lower remortgaging activity

### Key points

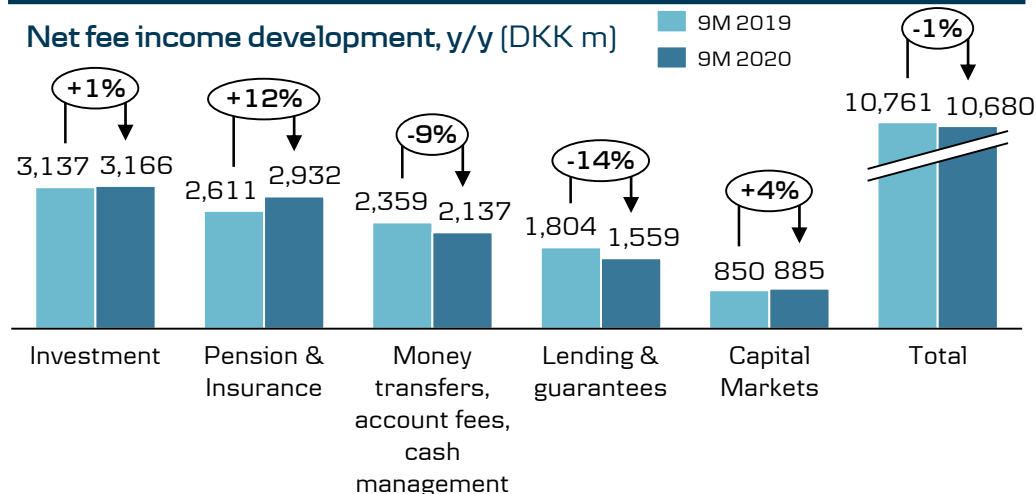

#### Y/Y

- Positive development at Danica Pension offset by lower activity-driven fees
- Banking DK fee income in 9M 2019 was affected by the Flexinvest Fri compensation of DKK 0.2 bn as well as extraordinarily high remortgaging activity

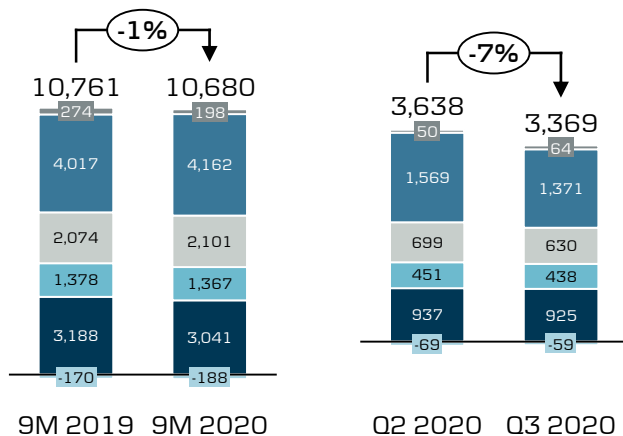

#### Q/Q

- Fee income stable excluding one-offs of approx. DKK 0.2 bn in Q2 and approx. -0.1 bn in Q3
- Better housing market activity at Banking DK

### Net fee income development, y/y (DKK m)

### Net fee income development, q/q (DKK m)

## Trading income: Stable development y/y driven by C&I; Q3 characterised by relatively high activity

### Key points

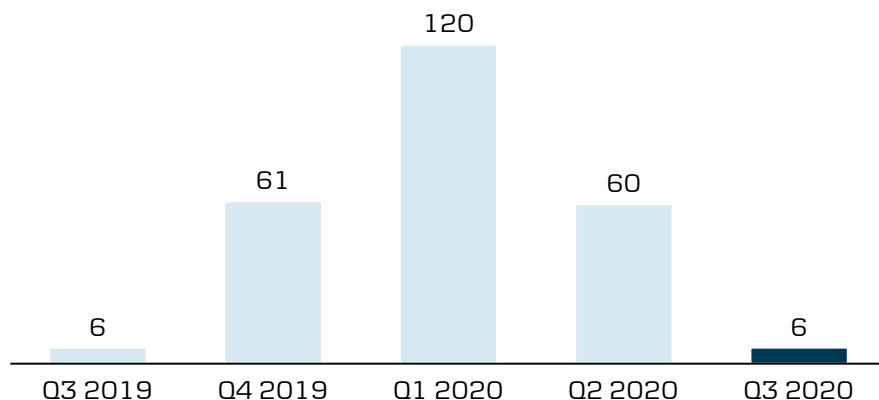

#### Y/Y

- Trading income up 1%, despite the turbulence in the financial markets in the first quarter of 2020, driven by higher customer activity and xVA tailwind of DKK 166 m in 9M 2020 (9M 2019: DKK -258 m)

#### Q/Q

- Q3 saw relatively high activity during the summer holiday period, following an unusually strong Q2 benefiting from the rebound in the financial markets after the March headwinds
- Tailwind from xVA of DKK 314 m in Q3 (Q2: tailwind of DKK 196 m)

### Refinancing income (DKK m)

### Group net trading income (DKK m)

# Expenses: Down 4% q/q; cost management initiatives on track; up 6% y/y due mainly to transformation and AML/Estonia

## Key points

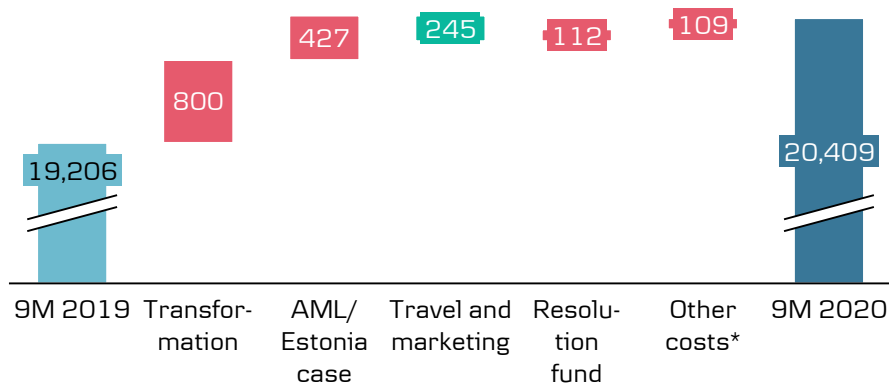

### Y/Y

- Expenses up 6%, due mainly to planned costs for the Better Bank transformation as well as ongoing compliance remediation and the Estonia case
- Announced discontinuation of up to 1,600 positions over the next 6-12 months

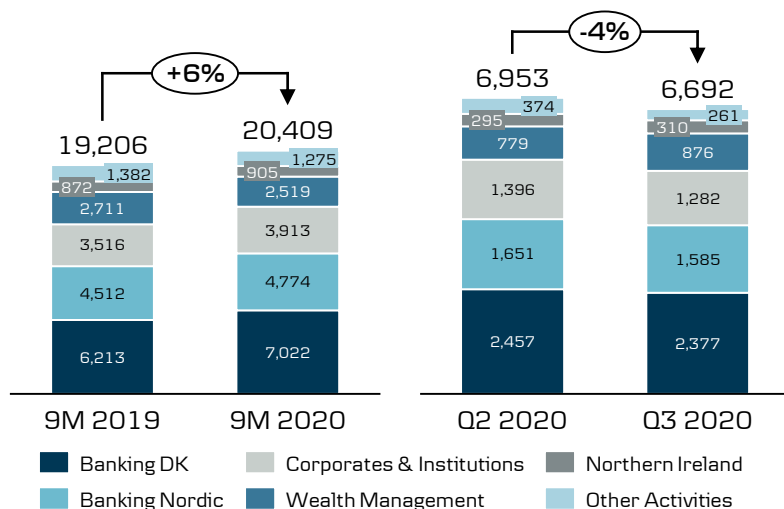

### Q/Q

- Expenses down 4% with lower staff costs
- Q3 included small negative extraordinary items related to remediation of legacy issues

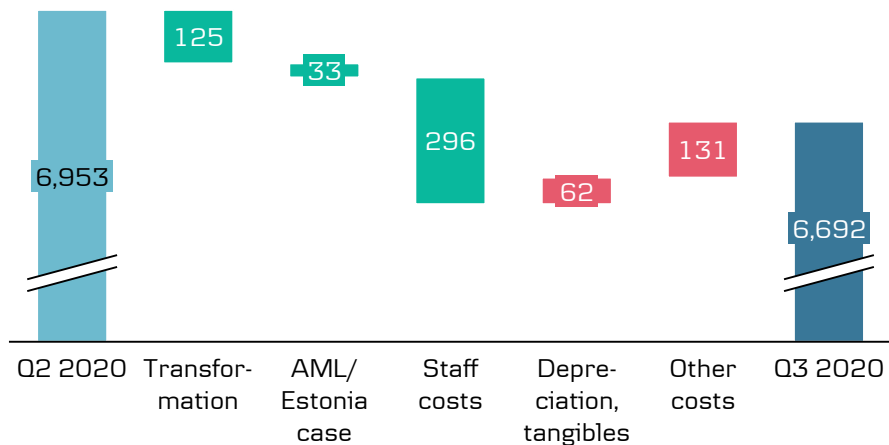

## Change in expenses, y/y (DKK m)

## Group operating expenses (DKK m)

## Change in expenses, q/q (DKK m)

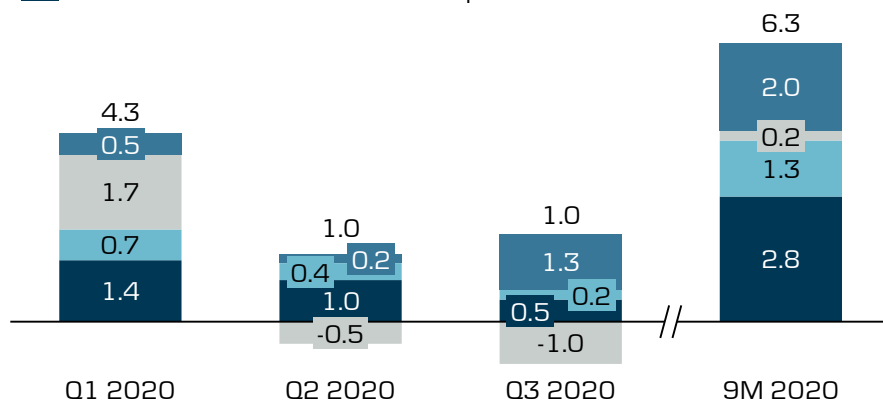

# Impairments: Macro-driven model releases countered by post-model adjustments; further oil-related charges

## Key points, Q3 2020

- Impairments were driven by further charges against single-names, mainly legacy exposures in the oil offshore segment
- Macroeconomic scenarios are based on a V-shaped recovery, thus leading to a reversal of DKK 1.0 bn as outlook is becoming more positive. However, given clouded visibility following Covid-19, additional post-model adjustments were booked
- Allowance account continues to include impairments booked for anticipated credit deterioration of DKK 2.2 bn. Allowance account development is driven by write-offs
- Charge of DKK 1.0 bn, reported loan loss ratio of 22 bp

## Impairment charges by category, 9M 2020 (DKK bn)

- Sector-specific post-model adjustments
- Forward-looking: Macroeconomic scenarios
- Credit deterioration: Other exposures
- Credit deterioration: Oil-related exposure

## Impairment charges by business unit, 9M 2020 (DKK m)

## Breakdown of core allowance account under IFRS 9 (DKK bn)

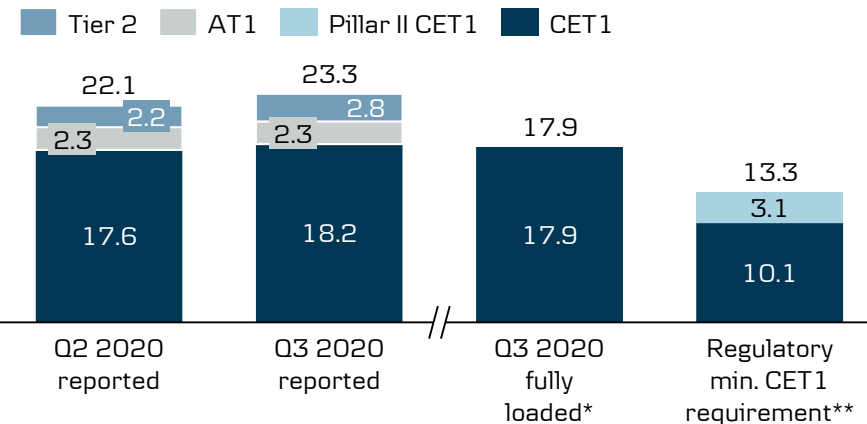

# Capital: Strong capital base; CET1 capital ratio of 18.2% (buffer of 4.9%)

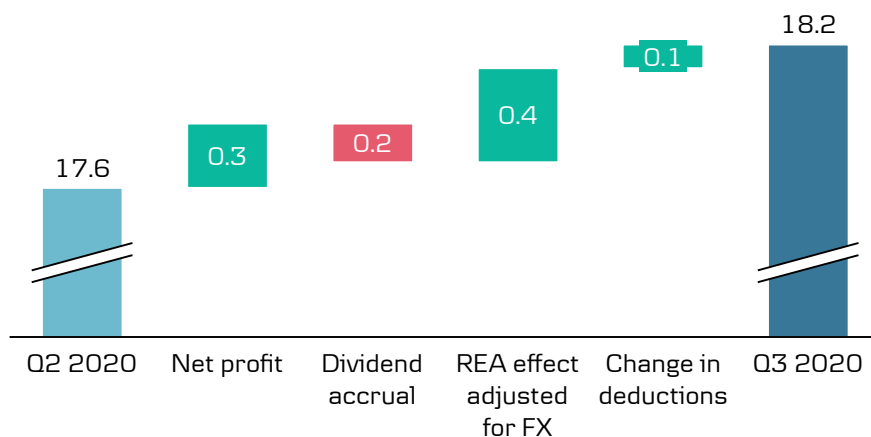

## Capital highlights, Q3 2020

- CET1 ratio up 0.6%-points q/q due mainly to lower market risk REA, as the higher risk levels in Q2 reversed in Q3
- Credit risk REA up DKK 1 bn as we are starting to see the effect of implementing the EBA guidelines – countered by lower lending volumes and FX effects
- In Q4 2020, we expect an impact on credit risk REA from model updates related to further implementation of EBA guidelines amounting to DKK 20-30 bn, all else equal
- CET1 ratio impact from FX movements eliminated by the structural FX hedge
- Leverage ratio of 4.4% under both transitional and fully phased-in rules

## Capital ratios, under Basel III/CRR (%)

## CET1 capital ratio, Q2 2020 to Q3 2020 (%)

## Total REA, Q2 2020 to Q3 2020 (DKK bn)

\* Based on fully phased-in requirement including fully phased-in impact of IFRS 9. \*\* Pro forma fully phased-in min. CET1 requirement in 2019 of 4.5%, capital conservation buffer of 2.5%, SIFI requirement of 3%, countercyclical buffer of 0.1% and CET1 component of Pillar II requirement.

## *Upgraded net profit outlook since Q2: We now expect net profit to be in the range of DKK 4.0–4.5 billion in 2020*

### Net interest income

We expect net interest income to be at around the same level as in 2019 as margin pressure and higher funding costs will offset continued volume growth

### Net fee income

**Revised:** Net fee income is now expected to be slightly lower than the level in 2019 as improved developments in the financial markets have partly offset lower remortgaging activity. Fee income is subject to uncertainty regarding AuM, customer activity and market developments

### Expenses

**Revised:** We now expect expenses to be around DKK 28 billion, including planned costs for the Better Bank transformation. In addition, full-year may also include a small extraordinary amortisation of intangible assets

### Impairments

Loan impairment charges are expected to be significantly higher due to the impact of the coronavirus pandemic on the economic outlook, with most impairments recognised already in the first nine months of the year

### Net profit

**Revised:** Net profit is now expected to be in the range of DKK 4.0-4.5 billion due to improved development in the financial markets and continually good progress in the underlying business

### Financial target

We maintain our ambition for an ROE of 9-10% in 2023

## Oil-related exposure: Continued impairments against single-name oil-related exposures in Q3

### Key points, 9M 2020

- The offshore segment, where we see credit deterioration, makes up 46% of the exposure and accounts for 90% of expected credit losses, and stage 3 exposure increased to 62%. Decrease in expected credit losses (DKK -1.0 bn) driven by write-offs in the segment.
- Uncertainty continues in the oil & gas industry; especially the offshore service and drilling segments led to additional impairments in 9M 2020. This was still driven by continually low oil prices and lower activity, which makes restructuring increasingly difficult as the willingness to provide new capital is limited. This also puts increasing pressure on collateral values within these industries, which impacts impairments. The prolonged weakness of the oil market increases uncertainty.

## Agriculture exposure

- In September, African Swine Fever (ASF) was confirmed among wild boars in Germany causing the stopping of German pork exports to China
- As a consequence, post-model adjustments were increased by DKK 0.2 bn as the Danish and German pork production industries are heavily interlinked with large exports of Danish-bred piglets to Germany
- Total accumulated impairments amounted to DKK 2.7 bn, of which DKK 1.1 bn in stages 1 and 2
- Realkredit Danmark represented 54% of total gross exposure and 18% of expected credit losses
  - LTV limit at origination of 60% at Realkredit Danmark

## Oil-related exposure

- Gross exposure decreased to DKK 20.9 bn from DKK 21.7 bn in Q2 2020\*
- Accumulated impairments at C&I decreased to DKK 3.3 bn, driven by write-offs. However, additional impairments were still taken, mainly in the offshore segment
- Most of the oil-related exposure is managed by specialist teams for customer relationship and credit management at Corporates & Institutions
- Post-model adjustments remain to cover the effects of the decline in oil prices on currently performing exposures

## Credit exposure: Limited exposure to transportation, hotels, restaurants and leisure

### Transportation exposure

- Gross exposure\* increased DKK 1.0 bn to DKK 17.8 bn from the Q2 2020 level driven by non-air passenger transportation
- Demand for cross-border passenger transport remains dramatically reduced. Danske Bank's spending monitor of 20 October shows that airline spending is around 25% of the level at the same time last year. At DKK 1.4 bn, our exposure to passenger air transport remains limited
- Accumulated impairments were at DKK 289 million in Q3, which is an increase from the Q2 level due to credit deterioration. The post-model adjustment on corona crisis high-risk industries remains in place

### Transportation by segment, Q3 2020 (DKK m)

0.7%	0.6%	277	

### Hotels, restaurant and leisure exposure

- Gross exposure increased to DKK 15.7 bn from 15.4 bn in Q2 2020. While exposure to restaurants and leisure increased slightly, exposure to hotels decreased
- Danske Bank's spending monitor of 20 October shows that hotel spending by Danes was around 20% lower than normal, and there was still very little foreign tourist spending. Spending at conventional restaurants was somewhat below the normal level, while Danes' spending at tourist attractions was not enough to compensate for the absence of foreign tourists. Spending at cinemas remains weak
- The share of Group net NPL increased to 4.2% from 1.9% in Q2 2020 driven by all sub-segments, while impairments increased to DKK 388 million from 290 million in Q2 2020 – primarily against hotels

### Hotels, restaurants and leisure by segment, Q3 2020 (DKK m)

## Credit exposure: Limited exposure to retailing and stable credit quality in commercial real estate

### Retailing

- Gross exposure decreased to DKK 26.0 bn from DKK 26.5 bn in Q2 2020. Over recent years, we have had a selective approach to this segment and have generally decreased exposures
- Danske Bank's spending monitor of 20 October shows that the effect of the payout of holiday back-pay of more than DKK 44 bn (before taxes) is starting to wear off. Segments such as electronics stores, D-I-Y and paint stores remained well above normal levels
- Share of Group net NPL increased to 7.5% from 6.6% in the preceding quarter
- Accumulated impairments remained unchanged

### Retailing by segment, Q3 2020 (DKK m)

### Commercial real estate

- Gross exposure increased to DKK 317.9 bn from 309.4 in Q2 2020 driven by increased lending to a single A-rated customer
- Overall, credit quality was stable
- Share of net NPL increased to 13.2% from 12.7% last quarter driven by higher NPL in Northern Ireland and Finland
- Exposure is managed through the Group's Credit Risk Appetite and there are caps in place for total level, concentration and growth, including a selective approach to the various sub-segments and markets
- Commercial property exposure is managed by a specialist team
- Geographically, the exposure is concentrated in Banking DK (49%) and Banking Nordic (44%) – primarily Sweden (27%)

Actual/Effective tax rate exclusive one-offs & prior-year reg.	23.6%	24.8%	23.9%	46.4%	

## Tax drivers, Q3 2020

- The actual tax rate of 23.6% (excl. prior-year regulations) is higher than the Danish rate of 22% due to tax-exempt income and expenses
- The permanent non-taxable difference derives mainly from tax-exempt income and expenses, such as value adjustments on shares
- The adjusted tax rate of 21.4% is lower than the Danish tax rate of 22% due to differences in statutory tax rates in the various countries in which we operate
