This statutory report on corporate governance for Danske Bank A/S ("Danske Bank", and the "Group", when including its subsidiaries) forms part of the management report in the Annual Report 2020, which covers the accounting period from 1 January - 31 December 2020.

The report comprises:

- Section A: status in relation to the Danish Recommendations for Corporate Governance
- Section B: the main elements of Danske Bank's internal control and risk management systems used in the financial reporting process
- Section C: risk management and risk categories
- Section D: the management bodies and their committees and functions

SECTION A: Status in relation to the Danish Recommendations for Corporate Governance

The Danish Recommendations on Corporate Governance, which are available on the Committee on Corporate Governance's website, corporategovernance.dk, apply to Danske Bank. The Main Market Rulebook also requires that Danish companies give a statement on how they address the recommendations.

The recommendations are best practice guidelines, which companies should generally follow. A company failing to comply with a recommendation must explain why it has deviated from the recommendation and what it has chosen to do differently (the "comply or explain" approach). Failure to comply with a recommendation is not considered a breach of rules, but merely implies that the company has chosen a different approach.

This Corporate Governance Report is issued pursuant to reporting for the financial year 2020, and as such reflects the Danish Recommendation on Corporate Governance issued in November 2017. The Danish Committee on Corporate Governance has issued new recommendations in December 2020, which will enter into force for reporting on the financial year 2021.

Below, the Board of Directors comments on the status of compliance with the recommendations issued by the Danish Committee on Corporate Governance. Danske Bank complies with all the recommendations.

• The Company complies

• The Company complies

The Board of Directors has elected both a Chairman and two Vice Chairmen. The Rules of Procedure of the Board of Directors include a description of their tasks, duties and responsibilities.

The Board of Directors further monitors progress against the targets set out in the Diversity and Inclusion Policy. The Diversity and Inclusion Policy is available on danskebank.com. In 2020 Danske Bank also issued a Diversity & Inclusion mission statement.

3.1.3. The Committee recommends that the selection and nomination of candidates for the board of directors be carried out through a careful and transparent process approved by the board of directors. When assessing its composition and nominating new candidates, the board of directors should, in addition to the need for competencies and qualifications, take into consideration the need for integration of new talent and diversity.

• The Company complies

The process for selection and nomination of candidates to the Board of Directors has been agreed by the Board of Directors as part of the action plan for the future composition of the Board of Directors. The Nomination Committee charter specifies that the committee must consider “the balance of the Board of Directors, including the need for changes and diversity in relation among other things to international experience, gender and age”. The 2020 diversity and inclusion targets for the share of females of the Board of Directors of 38% set by the Board of Directors was met in accordance with the Danish Business Authority’s guidance as 3 out of 9 Board members elected by the Annual General Meeting are females.

3.1.4. The Committee recommends that the notice convening a general meeting where the agenda includes the election of members to the board of directors, include (in addition to the statutory requirements) a description of the qualifications of nominated candidates, including information about the candidates’

- other executive functions, including positions on executive boards, boards of directors and supervisory boards, including board committees, in Danish and foreign enterprises, and
- demanding organisational tasks

• The Company complies

3.2 Independence of the board of directors

3.2.1. The Committee recommends that at least half of the members of the board of directors elected by the general meeting be independent persons, in order for the board of directors to be able to act independently of special interests.

To be considered independent, this person may not:

- be or within the past five years have been a member of the executive board, or senior staff member in the company, a subsidiary or an associated company,
- within the last five years have received significant remuneration from the company/group, a subsidiary or an associated company in a different capacity than as member of the board of directors,

Even if a member of the board of directors is not covered by the above criteria, certain conditions may exist that will lead the board of directors to decide that one or more members cannot be regarded as independent.

• The Company complies

Despite the fact that no members of the Board of Directors of Danske Bank are directly covered by the criteria pursuant to which Board members are not considered independent as listed in the recommendation on corporate governance, the Board of Directors of Danske Bank has decided that 2 of the 9 members of the Board of Directors elected by the general meeting in 2020 are non-independent due to their relations with the major shareholder, A.P. Møller Holding Group.

Information about the individual members' independence or non-independence is available in their CVs, which are published in the Annual Report and available on [danskebank.com](https://www.danskebank.com).

Information about the independence of candidates nominated by the Board of Directors is provided in the notice of the Annual General Meeting.

3.3 Members of the board of directors and the number of other management functions

• The Company complies

Members of the Board of Directors assess the expected time commitment for the performance of their tasks on the Board of Directors and, as the case may be, on committees necessary for active and value-adding contributions. 5.2 Whistleblower scheme

5.2.1. The Committee recommends that the board of directors establish a whistleblower scheme for expedient and confidential notification of serious wrongdoing or suspicions thereof.

The scheme is handled by Group Compliance and reviewed and monitored by the Conduct and Compliance Committee.

5.3 Contact to auditor

5.3.1. The Committee recommends that the board of directors ensure regular dialogue and exchange of information between the auditor elected by the general meeting and the board of directors, including that the board of directors and the audit committee meet with the auditor elected by the general meeting at least once annually without the executive board present. This also applies to the internal auditor, if any.

• The Company complies

The Board of Directors and the Audit Committee maintain a regular dialogue and exchange information with the Chief Audit Executive and the external auditor. Furthermore, each year, both the Board of Directors and the Audit Committee meet with the Chief Audit Executive and the external auditor without the Executive Leadership Team being present.

5.3.2. The Committee recommends that the audit agreement and auditor's fee be agreed by the board of directors and the auditor elected by the general meeting based on a recommendation from the Audit Committee.

• The Company complies

The Board of Directors and the external auditor agree on the terms of engagement and fees, based on recommendations from the Audit Committee.

SECTION B: The main elements of Danske Bank's internal control and risk management systems used in the financial reporting process

The basis of the financial reporting process is based on well-defined authorisations, a segregation of duties, regular reporting and transparency regarding the Group's affairs. The common IT platform helps provide the documentation of accounting data across the Group and reduce financial reporting risks.

Danske Bank's finance function ('CFO Area') regularly assesses financial reporting risks, which are part of financial control & strategic risk (see section C) and of which the most significant risks are regulatory risk, reporting process risk and value measurement risk. Regulatory risk relates to the increasing number of disclosure requirements imposed on Danske Bank by national as well as international bodies. Danske Bank must incorporate the required information in its financial reporting. Reporting process risk relates to the preparation of interim and annual reports. Because of the large data volumes and tight reporting deadlines, the financial reporting process depends on Danske Bank's IT systems. Value measurement risk relates to the financial items for which estimates and assumptions may significantly affect the valuation of assets and liabilities. These financial items are described in the Significant Accounting Estimates note to the consolidated financial statements.

The Executive Leadership Team has implemented controls to mitigate financial reporting risks which have been identified and regularly monitors changes in and compliance with relevant legislation and other financial reporting regulations. The purpose of the controls is to prevent, detect and correct reporting errors and irregularities. Although controls reduce the risk, they provide no guarantee against such errors and irregularities.

The Group has a well-established procedure of regular reporting. Internal management reporting is based on the same principles as external reporting, and local and central units use the same data and reporting systems. CFO Area reviews the reports and uses them to prepare the consolidated financial statements to be submitted to the Executive Leadership Team and the Board of Directors.

Danske Bank has an internal audit department ("Group Internal Audit") which is the third line of defence (see section C). It reports directly to the Board of Directors. Material and high risk areas are within the scope of Group Internal Audit's yearly auditing, while other areas are audited at least every three years unless it is assessed by Group Internal Audit that a longer rotation cycle is appropriate. The scope of audit includes key areas of the Group's risk management procedures, including risk reporting.

The Executive Leadership Team regularly reports to the Board of Directors and its committees on compliance with the risk framework defined by the Board of Directors and by statutory rules. The Board of Directors also receives accounting information on an ongoing basis. Group Compliance and Group Internal Audit submit reports to the Board of Directors on compliance with rules and regulations, including any violation(s) of internal business procedures and policies. Once a quarter, Group Internal Audit submits a report to the Audit Committee with information about the level of internal control across the Group.

SECTION C: Risk management and risk categories

The Enterprise Risk Management (ERM) framework defines how the Group manages risk and it specifies how risk responsibilities are structured to ensure appropriate oversight and accountability. The ERM framework sets common standards for how the Group organises activities to identify and respond to risks and helps the Group in meeting its objective to provide value to customers, employees, society, and investors.

The ERM framework as well as its supporting policies are approved by the Board of Directors.

Governance and responsibilities

The Group's risk management practices are organised in line with the principles of the three-lines-of-defence model. The three lines of defence segregate duties between risk ownership, risk oversight and independent risk assurance.

The first line of defence owns and manages the risks related to business activities. It consists of frontline and direct support functions and includes the business units, COO area, CFO area, Group legal, Group HR as well as Group Communications, Brand & Marketing. These units are responsible for identifying and managing risks across national borders, including designing, implementing and operating effective controls.

The second line of defence provides the risk management framework, performs risk oversight and support and challenge the first line of defence. It consists of Group Risk Management and Group Compliance. The second line of defence operates independently of the first line of defence.

The third line of defence evaluates and improves the effectiveness of risk management, control, and governance processes in relation to the control environments of the first and second lines of defence. It is made up of Group Internal Audit (GIA) which is an independent and objective unit headed by the chief audit executive (CAE). GIA reports directly to the Board of Directors.

Risk Taxonomy - risk categories

The risk taxonomy defines a common set of risk categories and definitions intended to ensure adequate risk identification and ownership across the Group. The risk categories cover both financial and non-financial risks.

Roles and responsibilities are defined for each identified risk category to ensure continuous monitoring and risk assessment. To ensure that risk categories reflect the Group's current main risks, the taxonomy is reviewed at least on an annual basis.

The annual Risk Management Report provides a detailed description of the risk categories identified in the risk taxonomy and is published together with the Annual Report. Both reports are available on danskebank.com.

The following section briefly outlines the categories.

The Group's financial risk categories

Credit risk

Credit risk is the risk of losses because debtors fail to meet all or part of their payment obligations to Danske Bank Group. Credit risk includes counterparty credit risk.

Market risk

Market risk is the risk of losses or gains caused by changes in the market values of the Group's financial assets, liabilities and off-balance-sheet items resulting from changes in market prices or rates.

Liquidity, funding and capital risk

Liquidity risk is the risk that lack of funding leads to excessive costs or prevents the Group from maintaining its business model or fulfilling payment obligations. Capital risk is the risk of not having enough capital to cover all material risks arising from the Group's chosen business strategy.

Insurance and pension risk

Danske Bank Group's insurance and pension risk consists of the risks originating from its ownership of Danica Pension. This includes market risk, life insurance risk and operational risk in Danica.

The Group's non-financial risk categories

Model risk

Model risk is the risk of adverse consequences resulting from decisions based on incorrect or misused model outputs and reports.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, systems and people or from external events. Operational risk includes legal risks.

Technology risk

Technology risk is the risk that a given threat will exploit vulnerabilities of an asset or a group of assets and thereby cause harm to the Group. It includes data and systems risks, such as unforced failures in technical infrastructure or data integrity.

Financial Crime risk

Regulatory Compliance risk

Financial control and strategic risk

Financial control risk is the risk of inaccurate or incomplete application of accounting and tax laws. Strategic risk is the risk of losing potential earnings opportunities resulting from the failure to account adequately for external forces in the Group's business strategy or any loss of market position due to the failure of the Group's business strategy.

SECTION D: The management bodies and their committees and functions

Danske Bank has a conventional two tier management structure with a Board of Directors and an Executive Leadership Team. Under the management structure, the Board of Directors is responsible for the overall and strategic management of Danske Bank, while the Executive Leadership Team is in charge of its day-to-day management, observing the guidelines, policies and instructions issued by the Board of Directors.

The Board of Directors consists of 13 members; 9 are elected by the general meeting, and 4 are elected by and among the employees. Under Danish law, employees are entitled to elect from among themselves a number of representatives equal to half of the number of members elected by the general meeting at the time of the announcement of the employee representative election.

The Board of Directors has established five Board committees: the Risk Committee, the Audit Committee, the Conduct & Compliance Committee, the Remuneration Committee and the Nomination Committee. The committees act as preparatory committees for the Board of Directors. The tasks of the committees are laid out in charters of each committee, which are reviewed at least once a year.

The Risk Committee operates as a preparatory committee for the Board of Directors with respect to Danske Bank's risk management and related matters. Danske Bank's risks include credit risk, market risk, liquidity, funding and capital risk, insurance and pension risk, model risk, operational risk, technology risk, financial control and strategic risk. The Committee advises the Board of Directors on Danske Bank's risk profile, risk culture, risk appetite, risk strategy and risk management framework as a part hereof. The Committee therefore reviews and submits recommendations to the Board of Directors regarding Danske Bank's risk appetites, policies and instructions, its capital, leverage, liquidity, solvency and recovery requirements, its operational resilience framework

(formerly named business continuity plans), its impairment levels, its products and services from a risk perspective and the credit quality of Danske Bank's loan portfolio. Furthermore, the Risk Committee reviews the use of internal models, the adequacy and sufficiency of staff resources of the risk management control function and incentive programmes from a risk perspective.

The Audit Committee operates as a preparatory committee for the Board of Directors with respect to accounting and auditing matters, including risk matters relating thereto. The Committee reviews and submits recommendations to the Board of Directors regarding financial reports and assessment of the related risks, key accounting principles and procedures, internal controls, and reports from both internal and external audit.

The Conduct & Compliance Committee operates as a preparatory committee for the Board of Directors with respect to conduct and reputational risk, compliance and financial crime, whistleblowing, and other matters. Furthermore the Committee oversees investigations of significant breaches, monitors the handling of claims and litigations and oversees communication with the Danish Financial Supervisory Authority and the whistleblower scheme. The Committee monitors the adequacy of Group compliance resources, oversees Danske Bank's conduct in relation to its corporate and societal obligations including setting guidance, direction and policies for the Group's approach to customers and regulation.

The Remuneration Committee operates as a preparatory committee for the Board of Directors with respect to matters concerning remuneration with special focus on the remuneration of members of the Board of Directors, the Executive Board, material risk takers, key employees and executives in charge of control and internal audit functions, and on incentive programmes. The Committee reviews and submits recommendations to the Board of Directors regarding remuneration

neration policies and practices, developments in remuneration levels, including variable remuneration. The Committee monitors the incentive programmes to ensure that they promote ongoing, long-term shareholder value creation and comply with the Remuneration Policy.

The Nomination Committee operates as a preparatory committee for the Board of Directors with respect to the nomination and appointment of candidates to the Executive Leadership Team and to the Board of Directors and evaluation of the work and performance of the Executive Leadership Team, the Board of Directors and its individual members. The Committee also submits proposals to the Board of Directors on policies for succession planning and diversity and inclusion.

In 2020, the Board of Directors carried out the annual evaluation of the Board of Directors, including its composition, the work of the Board Committees, the Committee structure and the leadership of the Board Chairman and the Executive Leadership Team. To ensure anonymity, an external consulting firm facilitated the evaluation. The findings and conclusions were presented to and discussed by the Board of Directors and the overall conclusions presented at the Annual General Meeting.

The Executive Leadership Team consists of:

- Chris Vogelzang, Chief Executive Officer;
- Berit Behring, Head of Large Corporates & Institutions (previously Head of Wealth Management and Interim Head of Corporates & Institutions);
- Karsten Breum, Head of Group HR (as of 25 August 2020);

- Glenn Söderholm, Head of Personal & Business Customers (previously Head of Banking Nordic and Interim Head of Banking DK);
