

Danske Bank A/S

Update

Key Rating Drivers

High Credit Quality: Danske Bank A/S's ratings reflect its strong universal banking franchise in Denmark and, increasingly, across the Nordic region. Danske's strong pan-Nordic focus provides stable revenue generation across a wide range of products, while taking on low levels of risk. Its strong financial profile is underpinned by its stable and diversified funding, solid capitalisation and stable asset quality. This offsets its subdued profitability, which has remained under pressure since 2019.

Resolved AML Case: In December 2022, the bank finalised the settlement with the US and Danish authorities regarding past anti-money-laundering (AML) control deficiencies in its Estonian branch, which resulted in a fine for the bank. The penalty was rating neutral and comfortably absorbed by the bank's earnings and capital surplus.

Leading Danish Bank: Danske is the largest bank in Denmark and the second largest in the Nordic region. It is a growing challenger in Sweden, Norway and Finland, and also has a small franchise in Northern Ireland. Its revenue has been broadly stable, with a business model focused on traditional commercial banking, and capturing a larger share of its customers' spending by offering wealth and life insurance products.

Low Risk Profile: Fitch Ratings expects Danske's risk profile to remain resilient to the current economic downturn due to its consistently low-risk and tested underwriting standards. Danske's loan book is diversified by industry and geography, and is prudently collateralised with conservative loan/value ratios. At end-September 2022, 60% of Danske's credit exposure was to low-risk sectors, dominated by mortgage loans, which is a natural asset-quality stabiliser due to historically low levels of impaired loans and muted credit losses.

Stable Asset Quality: Danske enters the economic slowdown with strong asset-quality metrics. Its impaired loans ratio is weaker than at highly rated Nordic peers', but it has been broadly stable since 2018. We expect the bank's impaired loans ratio to rise to 2.8% by end-2023, but loan impairment charges (LICs) should be contained, due to prudent collateralisation and large adjustments to impairment models (34bp of loans).

Profitability Turnaround: The bank's profitability has recently suffered from expensive compliance investments, deposit margin pressure and higher funding cost than peers'. In 2022, we expect a weak operating profit/risk-weighted assets (RWAs) due to inflated costs, subdued trading, insurance and fee income. The ratio should sustainably improve to above 2% in 2023 despite higher LICs. The improvement stems from a gradual completion of remediation projects and a material net interest income (NII) growth due to interest rate hikes.

Solid Capitalisation: Danske's common equity Tier 1 (CET1) ratio decreased modestly to 16.9% at end-September 2022 from 17.1% at end-June 2022, well above its regulatory requirement of 12.4%. Danske's leverage ratio is moderate, but still adequate in light of its low-risk profile. The bank's loss-absorption capacity was sufficient to cushion the fine without material impact on its regulatory capital buffers.

Stable Diversified Funding: Danske is reliant on wholesale funding, like most Nordic banks, due to a well-developed covered bond market matching mortgage lending and structural deposit shortage in the region.

Its well-diversified funding base and an established presence in the international debt markets have been resilient to the negative news from the AML investigations and economic downturns, enabling the bank to execute its funding plan. The bank's low refinancing risk is underpinned by well-spread maturities, a strong captive domestic investor base and ample liquidity surplus.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

Fitch could downgrade the bank's ratings if its CET1 ratio surplus over its requirement decreases materially below 250bp (about EUR3 billion), coupled with durably deteriorated profitability and asset quality, which could be triggered by a more severe and prolonged economic downturn than we currently expect.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

Following the Estonia case settlement, the most likely trigger for an upgrade would be the successful implementation of the bank's transformation plan. This would have to be demonstrated by a durable recovery in the operating profit/RWAs to at least 2.5%. An upgrade would also be contingent on the bank maintaining a CET1 ratio of at least 15%.

Other Debt and Issuer Ratings

Rating Level	Rating
Long- and short-term deposits and senior preferred debt	A+/F1
Senior non-preferred debt	A
Tier 2 subordinated debt	BBB+
Additional Tier 1 notes	BBB-

Source: Fitch Ratings

Danske's Derivative Counterparty Rating (DCR) and its long-term senior preferred debt and deposit ratings are one notch above the Long-Term Issuer Default Rating (IDR), and its long-term senior non-preferred debt is aligned with its Long-Term IDR. This reflects the protection that could accrue to senior creditors from the bank's more junior bank resolution debt and equity buffers. We expect Danske's resolution debt buffer to remain comfortably above 10% of RWAs in the long term, adjusted for Realkredit Danmark A/S (A/Stable/a), its domestic mortgage bank subsidiary, which is excluded from Danske's resolution strategy. At end-June 2022, these buffers were equivalent to 19% of RWAs.

The bank's short-term senior preferred debt and deposit ratings are mapped to their respective long-term ratings and also reflect our assessment of the bank's funding and liquidity at 'a+'.

Danske's Tier 2 debt is rated two notches below its Viability Rating (VR) to reflect the poor recovery prospects of this type of debt. Additional and legacy Tier 1 securities are rated four notches below the VR to reflect their poor recovery prospects (two notches) and high risk of non-performance (an additional two notches). Fitch's assessment is based on an expectation that the bank will continue operating with a CET1 capital ratio comfortably above its maximum distributable amount.

Significant Changes from Last Review

3Q22 Performance Hurt by AML Settlement and Inflated Expenses

Danske's ratings are unaffected by the DKK15.3 billion (about EUR2.1 billion) fine related to past AML control deficiencies in its Estonian branch. The settlement was finalised on 13 December, but Danske provided for the potential fine already in 3Q22 and consequently reported a quarterly loss of almost DKK14 billion. Fitch regards the penalty as a non-operating expense, with a material one-off impact on bottom-line profitability, but neutral for its CET1 ratio. The bank's expectation of an annual loss not higher than DKK5.3 billion, including a one-off gain of about DKK0.4 billion in 4Q22, is credible.

The CET1 ratio impact from the fine was almost fully neutralised by a reversal of proposed dividend, lower RWAs for market risk and lower CET1 capital deduction for the insurance business. The bank's CET1 ratio requirement was lowered by 90bp to 12.4% due to a release of a DKK7.5 billion Pillar 2 capital add-on, earmarked for a potential liability related to the Estonian AML case. The requirement will increase to 13.6% from end-June 2023 due to announced higher countercyclical buffers in Denmark, Sweden and Norway.

The bank's 3Q22 operating profit fell 39% yoy to DKK2.6 billion, mainly due to DKK1.3 billion settlement of errors identified in a legacy debt collection case. Danske also incurred DKK1.6 billion goodwill impairment, which we treat as a non-operating cost. NII was 14% up yoy, benefitting from a significant increase in deposit margins and solid credit demand. The recent rate increases and the withdrawal of domestic negative deposit rates will moderately support NII in 4Q22, and will provide more significant support in 2023. However, credit demand should subside next year due to

the economic slowdown. Recurring expenses were in line with the annual target of DKK25.5 billion despite inflation, which we believe bodes well for the bank's ambitious cost reduction target next year.

Danske enters the economic slowdown with strong asset quality metrics, with Stage 3 loans that decreased by 4% qoq, while Stage 2 loans were stable. LICs were only DKK0.4 billion net of releases, and included DKK0.7 billion extra charges related to the settlement of the debt collection case. Credit losses should remain contained in 4Q22 but are likely to increase in 2023.

Contained Asset-Quality Pressure in the Real Estate Exposure

Housing and commercial real estate (CRE) loans represent the largest share of Danske's credit exposure. The risks are rising due to the notably more challenging operating environment, but we expect these portfolios to perform well.

Home prices started falling in summer 2022 in the Nordic region, and we expect that this will continue next year. Most of the large price gains reported during the pandemic since early 2020 could be reversed, with the biggest decline most likely in Sweden. However, the risk of negative equity is low for most borrowers. Fitch expects prices to start to recover in 2024, but it will be different across the region. In Sweden, the price contraction could exceed 20%, but a complete reversal of pandemic gains is unlikely. In Denmark, we forecast nominal home prices to decrease by up to 10% in 2023. The risk of a housing market crash is cushioned by a strong labour market and only a moderate economic downturn in the region that should contain the inflow of forced sellers.

CRE exposure is well-diversified by borrower and geography, and it mainly comprises high-quality borrowers with sustainable income sources. The increasing yield requirements are pushing property prices down, but the refinancing risk should be manageable. Asset-quality pressure in CRE exposure could be amplified if a deeper than originally expected economic downturn materially hurts rental income, while funding costs remain prohibitive and access to the debt markets stays restricted for a prolonged period.

■ Higher influence
 ■ Moderate influence
 ■ Lower influence

Danske's Government Support Rating of 'no support' reflects Fitch's view that senior creditors cannot rely on receiving full extraordinary support from the sovereign in the event of the bank becoming non-viable. The EU's Bank Recovery and Resolution Directive provides a framework for resolving banks that will require senior creditors to participate in losses, if necessary, instead of or ahead of a bank receiving sovereign support.

Environmental, Social and Governance Considerations

How to Read This Page
ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference	S Scale	
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Business Profile (incl. Management & governance); Risk Profile	5	
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Business Profile (incl. Management & governance); Risk Profile	4	
Labor Relations & Practices	2	Impact of labor negotiations, including board/employee compensation and composition	Business Profile (incl. Management & governance)	3	
Employee Wellbeing	1	n.a.	n.a.	2	
Exposure to Social Impacts	3	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Business Profile (incl. Management & governance); Financial Profile	1	

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference	G Scale		CREDIT-RELEVANT ESG SCALE How relevant are E, S and G issues to the overall credit rating?
Management Strategy	3	Operational implementation of strategy	Business Profile (incl. Management & governance)	5		5 Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal/compliance risks; business continuity; key person risk; related party transactions	Business Profile (incl. Management & governance); Earnings & Profitability; Capitalisation & Leverage	4		4 Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Business Profile (incl. Management & governance)	3		3 Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Business Profile (incl. Management & governance)	2		2 Irrelevant to the entity rating but relevant to the sector.
				1		1 Irrelevant to the entity rating and irrelevant to the sector.

Unless otherwise disclosed in this section, the highest level of ESG credit relevance is a score of '3'. This means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

DISCLAIMER & DISCLOSURES

Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$ 1,000 to US\$ 750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$ 10,000 to US\$ 1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
