Section D – Risks

Element	Title	
D.2	Key risks specific to the Issuer	<p>In purchasing Notes, investors assume the risk that the Issuer may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuer becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer may not be aware of all relevant factors and certain factors which it currently deems not to be material may become material as a result of the occurrence of events outside the Issuer's control. The Issuer has identified in the Base Prospectus a number of factors which could materially adversely affect its business and ability to make payments due under the Notes. These factors include:</p> <ul style="list-style-type: none"> the Group is exposed to a number of risks, the categories of which are credit risk, market risk, liquidity risk, operational risk, insurance risk, pension risk and business risk;

		<ul style="list-style-type: none"> • regulatory changes could materially affect the Issuer’s business; • the Issuer will face increased capital and liquidity requirements as a result of the new framework implementing, among other things, the Basel Committee on Banking Supervision’s proposals imposing stricter capital and liquidity requirements upon banks in the European Union; • the Issuer may be subject to more onerous regulatory capital requirements or buffer capital requirements which may affect the Issuer’s capacity to make payments of interest on the Notes; • the implementation of a bank recovery and resolution directive or the taking of any action under it could materially affect the value of any Notes; • there are certain Danish resolution regimes which may impact the Notes; • the Group may have to pay additional amounts under resolution funds or deposit guarantee schemes; and • the Group may be affected by general economic and geopolitical conditions.
<p>D.3</p>	<p>Key information on key risks specific to the Notes</p>	<p>There are also risks associated with specific types of Notes, and with the Notes and the markets generally including:</p> <ul style="list-style-type: none"> • an active secondary market in respect of the Notes may never be established or may be illiquid and this would adversely affect the value at which an investor could sell its Notes; • if an investor holds Notes which are not denominated in the investor’s home currency, it will be exposed to movements in exchange rates adversely affecting the value of its holding; • [the value of the Notes may be adversely affected by movements in market interest rates;] • credit ratings assigned to the Issuer or the Notes may not reflect all the risks associated with an investment in the Notes and may be lowered, withdrawn or not maintained; • the Issuer is exposed to changing methodology by rating agencies; • the Notes may not be a suitable investment for all investors; • [as the Issuer has the right to redeem the Notes at its option, this may limit the market value of the Notes concerned and an investor may not be able to reinvest the redemption proceeds in a manner which achieves a similar effective return;] • the Issuer has issued covered bonds and, if any relevant claims in respect of these covered bonds are not met out of the pool of assets or the proceeds arising from it, any remaining claims will subsequently rank <i>pari passu</i> with the Issuer’s obligations under the Notes; • investors will have to rely on the clearing system procedures for transfer, payment and communication with the Issuer; • the terms and conditions of the Notes contain provisions which may permit their modification without the consent of all investors; • the value of the Notes could be adversely affected by a change in law or administrative practice;

		<ul style="list-style-type: none"> • Foreign Account Tax Compliance withholding may affect payments on the Notes[; and/;] • certain Dealers may transact with or perform services for the Issuer in the ordinary course of business[; and/.] • [the recognition as eligible collateral for the Eurosystem and intra-day credit operations by the Eurosystem of new global notes and registered Notes held under the new safekeeping structure is dependent upon satisfaction of the Eurosystem eligibility criteria at the relevant time[; and/.]] • [investors who purchase Notes in denominations that are not an integral multiple of the specified denomination may be adversely affected if definitive Notes are subsequently required to be issued][;/.] • [the Renminbi is not freely convertible; there are significant restrictions on remittance of Renminbi into and outside the People’s Republic of China (the “PRC”); • there is only limited availability of Renminbi outside the PRC, which may affect the liquidity of the Renminbi Notes and the Issuer’s ability to source Renminbi outside the PRC to service such Renminbi Notes; • payments for Notes denominated in Renminbi will only be made to investors in the manner specified for such Notes in the conditions of the Notes; and • there are risks relating to Notes denominated in other emerging market currencies.]
