Pro forma figures include the Sampo Bank group as of February 2006.

Management's report

- Net profit up 11% compared with first-half-2006 pro forma figure. The result is better than expected
- The Group raises its profit guidance for 2007 on the basis of the financial results for the first half of 2007 and the positive effect of amendments to Danish tax regulations. Net profit for the year is expected to match the pro forma figure for 2006
- Net interest income up 11% on pro forma figure for the first half of 2006
- The 13% increase in expenses reflects primarily planned expenses for the integration of acquired business units. Real underlying trend in costs showed an increase of only 3%
- Considerable customer activity following the successful launch of new online services and savings products in Denmark and Sweden
- Improved profitability of international banking operations
- Lending up 12% on end-June-2006 pro forma figure
- Units outside Denmark accounted for 56% of total growth in lending by banking activities
- Sampo Bank integration on schedule

Financial results for the first half of 2007

Net profit for the first six months of 2007 amounted to Dkr7,629m, which was higher than expected at the presentation of the financial report for the first quarter of 2007.

Danske Bank Group's purchase of the Sampo Bank group was approved on January 30, 2007, and took effect on February 1, 2007. The accounts of the Sampo Bank group were consolidated in the accounts of the Danske Bank Group with effect from this date. Comparative figures for the Sampo Bank group are incorporated from February 2006, and this report comments on the results realised for the first half of 2007 relative to the pro forma figures for 2006.

Net profit rose 11% on the first-half-2006 pro forma profit.

Income

Income increased by 12% to Dkr22,597m on the amount recorded in the first half of 2006. This increase was attributable to the favourable trends in net trading income and the Group's banking and insurance operations.

Net interest income rose to Dkr11,777m, up 11% on the level recorded in the first half of 2006. The positive trend reflects the persistently high growth in lending and higher interest rates, which more than compensated for the pressure that the Group's new banking products, among other things, brought on margins.

Net fee income declined by 2% to Dkr4,396m. This fall was the result primarily of expenses

incurred for the hedging of the credit risk associated with a portfolio of mortgage loans by credit default swaps. Excluding these expenses, net fee income rose 1% in spite of the general slowdown in the Danish housing market.

Net trading income increased 11% to Dkr4,203m, driven by higher customer activity and a stable profit from position taking.

Other income rose by 17% to Dkr1,552m. Most of the increase derived from profits of Dkr199m on the sale of five Norwegian branches.

Net income from insurance business rose from Dkr33m in the first half of 2006 to Dkr669m in the first half of 2007 owing to improved investment results.

Operating expenses

The cost/income ratio was unchanged at 55%. Excluding total integration expenses, the cost/income ratio was unchanged at 51%.

Expenses rose 13%. The increase was the result of expenses relating to the integration of acquired business units, higher performance-based compensation and increased activity in the Group's operating lease business. In accordance with international accounting standards, only expenses incurred by the Group for its development of software are capitalised; capitalisation of expenses for pre-analysis, user testing and implementation is not allowed. In the first half of 2007, the Group invested considerable resources in pre-analysing the integration

of Sampo Bank's systems and upgrading other IT systems within the Group.

The table below, showing the underlying trend in costs, does not include such expenses and other separate items.

EXPENSES (DKr m)	First half 2007	First half 2006	Index 07/06
Total expenses	12,530	11,131	113
Amortisation of intangible assets	557	274	203
Integration expenses	465	471	99
Total expenses, excl. total integration expenses	11,508	10,386	111
Performance-based compensation	663	497	133
Increase in operating leases	580	474	122
Nylander estate-agency business, Norway (acquired in Q3, 2006)	43	-	-
Sale of pension obligation, Norway	-	-200	-
Capitalisation of development costs	-3	-269	-
Underlying trend in expenses	10,225	9,884	103
Cost/income ratio, %	55.4	55.0	
Cost/income ratio, excl. total integration expenses, %	50.9	51.3	

Comparative figures include Sampo Bank as of February 2006.

Despite the growth in lending and generally strong business activity, the underlying trend in costs showed an increase of only 3%. This reflects partly the cost synergies realised in the acquired business units and partly the cost-efficient scalability of the Group's IT platform.

Credit loss expenses

Credit loss expenses amounted to DKr5m, against a net positive entry of DKr477m in the first half of 2006. Economic conditions in the markets on which the Group operates remained favourable.

Tax

With effect from January 1, 2007, the Danish corporation tax rate was lowered from 28% to 25%. This reduced the tax charge for the first half of 2007 by DKr368m, of which DKr188m derived from the change in deferred tax at the beginning of 2007.

Return on equity

The return on equity stood at 15.9%, against 16.6% a year earlier. Net profit for the period per share rose from DKr9.7 to DKr11.1, or 14%.

For 2006, return on equity and net profit for the period per share were calculated in accordance with the Group's organisation and capital structure prior to the acquisition of the Sampo Bank group.

Capital and solvency

Shareholders' equity

Shareholders' equity was DKr97.5bn at the end of June 2007, against DKr95.2bn at the end of 2006. The change reflects primarily the dividend payment in March 2007 and the recognition of the profit for the period.

At the end of June 2007, the share capital totalled DKr6,988,042,760 and shares numbered 698,804,276. The number of shares outstanding at the end of June 2007 was 683,850,098. The figures include the issuance of 60,500,000 shares in November 2006 to finance part of the acquisition of Sampo Bank. The average number of shares outstanding in the first half of 2007 was 684,477,896.

Solvency

The solvency ratio at the end of June 2007 was 9.7%, of which 6.7 percentage points derived from the Group's core (tier 1) capital. The core (tier 1) capital ratio, excluding hybrid core capital, stood at 5.8%. At the end of 2006, the solvency and core (tier 1) capital ratios stood at 11.4% and 8.6%, respectively. Most of the decline reflects deductions for intangible assets on the acquisition of the Sampo Bank group.

CAPITAL	Target (%)	Achieved first half 2007 (%)
Core (tier 1) capital ratio, excl. hybrid core capital	5.5-6.0	5.8
Hybrid core capital ratio	1.0-1.5	0.9
Solvency ratio	9.0-10.0	9.7
Expected pay-out ratio	30-50	40

The increase in risk-weighted items from DKr1,119bn at the beginning of the year to DKr1,194bn at the end of June 2007 was attributable primarily to the consolidation of the Sampo Bank group. The hedging of the credit risk associated with a portfolio of mortgage loans by credit default swaps reduced risk-weighted items by DKr140bn.

For 2006, the solvency ratio, core (tier 1) capital ratio and risk-weighted items were calculated in accordance with the Group's organisation and capital structure prior to the acquisition of the Sampo Bank group.

On January 1, 2007, the new Capital Requirements Directive took effect, allowing financial institutions to choose between various methods to calculate capital adequacy. In 2006, the Group applied to the Danish Financial Supervi-

sory Authority (FSA) for permission to use advanced internal models to calculate the capital requirement for its credit risks. The Group expects to incorporate the new methods from 2008, with full effect in 2010.

Balance sheet

Lending

Lending, excluding reverse transactions, rose by DKr169bn, or 12%, from the end of June 2006 to DKr1,591bn at the end of June 2007.

Loans and advances extended by the Group's operations in Denmark rose by DKr74bn, or 9%, on the end of June 2006.

Loans and advances extended by the Group's non-Danish operations grew by DKr95bn, or 17%. Units outside Denmark accounted for 56% of total growth in lending.

LENDING, END OF PERIOD (DKr bn)	First half 2007	First half 2006	Index 07/06
Banking Activities Denmark	338	291	116
Mortgage Finance	600	573	105

Banking Activities Baltics	23	15	156
Other	38	33	115
Total international	605	510	119
Total lending	1,591	1,422	112

Comparative figures include Sampo Bank.

Overall, Group loans and advances to retail customers rose by 10%, whereas loans and advances to corporate customers grew by 14% on the figures recorded in the first half of 2006.

Deposits

Deposits, including pooled schemes, rose 15% from DKr696bn at June 30, 2006, to DKr803bn a year later.

Deposits at the Group's banking operations in Denmark increased by DKr70bn, or 16%.

Deposits at the Group's non-Danish banking operations grew by DKr37bn, or 14%. Units outside Denmark accounted for 35% of total growth in deposits.

DEPOSITS, END OF PERIOD (DKr bn)	First half 2007	First half 2006	Index 07/06
Banking Activities Denmark	343	305	113
Other	158	126	125
Total Denmark	501	431	116
Banking Activities Finland	89	87	102
Banking Activities Sweden	51	45	115

Banking Activities Ireland	22	17	132
Banking Activities Baltics	9	7	124
Other	13	11	114
Total international	302	265	114
Total deposits, incl. pooled schemes, etc.	803	696	115

Comparative figures include Sampo Bank.

Trading portfolio assets

Trading portfolio assets rose by DKr131bn from DKr408bn at the end of June 2006 to DKr539bn on June 30, 2007. The increase was owing to larger holdings of bonds and a rise in the positive market value of derivatives. The increase in value was offset by a similar increase in the negative market value of derivatives recognised as trading portfolio liabilities.

The Group uses the Value-at-Risk (VaR) measure to calculate the daily market risk of its exposures. VaR expresses, at a confidence level of 99%, the maximum amount that the Group would lose assuming that the exposure was maintained for 10 days. Excluding Danica Pension, the Group's VaR amounted to DKr377.2m at the end of the first half of 2007, against DKr398.6m at June 30, 2006. In the first half of 2007, average VaR amounted to DKr287.2m, against DKr275.8m in the first half of 2006.

Senior management changes

In June, Jakob Brogaard, Deputy Chairman of the Executive Board, reached the age of 60 and retired after 43 years of service to Danske Bank. Mr Brogaard resigned from the Executive Board of Danske Bank A/S on June 30, 2007, but he will continue to sit on the boards of some of the Group's units, including the board of directors of Realkredit Danmark A/S, of which he is the chairman.

Sampo Bank

After the purchase had been completed at the beginning of February 2007, the organisation of Sampo Bank was adjusted to the Danske Bank Group's structure. Independent management teams were appointed for the operations in Finland and the Baltics, and general adjustments were made to the organisation to ensure that it reflects the structure of the Danske Bank Group.

The integration of Sampo Bank into the Danske Bank Group's systems, products and processes, including credit approval and financial control procedures, is on schedule. Pre-analyses have been completed, and requirements for the next steps of the migration process are now being prepared.

The Group expects to migrate Sampo Bank's Finnish activities to Danske Bank's IT platform at Easter 2008, at which time Sampo Bank is also expected to be converted into a branch of the Danske Bank Group.

Overall integration costs are expected to total some Dkr1.6bn. At the end of June 2007, the Group had expensed Dkr96m.

The integration is expected to create annualised cost and funding synergies of Dkr0.6bn (Dkr0.1bn in 2007, Dkr0.4bn in 2008 and Dkr0.6bn in 2009).

Danske Bank expects that the purchase of Sampo Bank will have a positive effect on earnings per share from the second half of 2008.

The note "Acquisition of subsidiary undertakings" gives more information on the accounting effects of the acquisition.

Outlook for 2007

The year 2007 is expected to be another satisfactory year for the Danske Bank Group. The Group's outlook is based on the pro forma financial highlights for 2006 presented in the financial report for the first quarter of 2007.

The Group raises its profit guidance for 2007 on the basis of the financial results for the first half of 2007 and the positive effect of amendments to Danish tax regulations. The Group now expects its profit before credit loss expenses to be slightly higher than the profit reported for 2006. Net profit for the year is now expected to match the pro forma figure for 2006.

In 2007, Europe is likely to see a persistent rise in average interest rates and moderate economic growth. Economic growth in Denmark may be slightly lower than the EU average, whereas growth rates in the Group's other markets are expected to be higher.

Net interest income is expected to rise by 8-10%, primarily as a result of double-digit lending growth in the markets on which the Group operates and the probable rise in average interest rates.

Net fee income is likely to grow by 1-3%, due mainly to an increase in trading volume on the securities markets and despite expenses for the credit default swaps entered into in connection with the financing of the acquisition of the Sampo Bank group. Mortgage finance activities are likely to slow down a little.

Net trading income is expected to increase by 3-7% on the high level recorded in 2006. The Group expects to maintain its market position, but income will continue to depend greatly on trends in the financial markets, including the level of securities prices at the end of the year.

Other income is likely to fall by 5-7% as the Group does not expect to realise income from the sale of property on the scale recorded in 2006.

The Group does not expect the investment return on its insurance business in the second half

of 2007 to match the high return generated in the first half of the year. Overall, net income from insurance business in 2007 is expected to fall by 2-5% on the income received in 2006. This decline must be seen in the light of the reduction in capital allocated to the insurance business in 2007. The result will, however, also depend greatly on trends in the financial markets.

The Group expects operating expenses to rise by 8-9%, with an underlying increase of 0-1%, as shown in the table below.

EXPECTED TREND IN EXPENSES	Rise [%]
Total expenses	8-9
Of which total integration expenses	5
Other expenses	3-4
Performance-based compensation	1
Increase in operating leases	1
Sale of pension obligation in 2006, Norway	1
Underlying expenses	0-1

Profit before credit loss expenses is expected to be slightly higher than the profit reported for 2006.

The Group does not expect to realise a net positive entry for credit loss expenses for the whole of 2007 as was the case in 2006. Assuming favourable economic trends and satisfactory loan portfolio quality, the Group expects to record modest credit loss expenses in 2007.

Profit before tax for 2007 is therefore expected to be slightly lower than the profit generated in 2006.

The positive effect of amendments to Danish tax regulations is expected to reduce the tax charge for the year by Dkr0.5bn. As a result of the amendments, the Group's effective tax rate is expected to fall from 27% to 25%.

Net profit for the year is expected to match the pro forma figure for 2006.

Comparative figures for Banking Activities Finland, Banking Activities Baltics, Danske Markets, Danske Capital and Other Areas comprise the pro forma financial results of the Sampo Bank group as of February 2006.

Danske Bank Denmark and BG Bank merged into a single business unit on April 10, 2007. The accounts of the two business areas were consolidated with effect from January 1. Danske Bank's Helsinki branch forms part of Banking Activities Finland, and Danske Bank Luxembourg forms part of Danske Capital. In 2006, both units were included in Other Banking Activities. Comparative figures have been restated.

The Sampo Bank group was consolidated in the accounts of Danske Bank with effect from February 2007. Comparative figures for the banking activities in Finland and the Baltics, Danske Markets, Danske Capital and Other Areas have been restated on a pro forma basis to include the

financial results of the Sampo Bank group as of February 2006. Consequently, this report comments on the results of these business areas for the first half of 2007 relative to the pro forma figures for 2006.

Capital allocated to business areas is calculated at a rate of 5.5% as opposed to the rate of 6.5% applied before January 1, 2007. The change reduced net interest income from the Group's banking activities by DKr158m in the first half of 2007. This amount was booked as income under Other Areas. Comparative figures have not been restated. Furthermore, the change lifted the pre-tax profit as % p.a. of allocated capital.

Banking Activities Denmark

Banking Activities Denmark encompasses the banking activities of Danske Bank in Denmark. Danske Bank caters to all types of retail and corporate customers. Danske Bank's finance centres serve large corporate and private banking customers. Banking Activities Denmark has nine regions with 424 branches, five agricultural centres, nine finance centres and around 6,000 employees.

The banking activities of BG Bank and Danske Bank Denmark merged on January 1, 2007. Comparative figures for 2006 have been restated.

- Profit before credit loss expenses at the level recorded in the first half of 2006
- Growth in lending of 16%
- Successful launch of new products

Demand for financial products and services remained high in the first half of 2007, although the period was characterised by a decrease in the sale of home financing loans compared with the level recorded in the first half of 2006.

Net interest income rose 9% to DKr5,164m on the level recorded in the first half of 2006. The increase was attributable to growth in loans and advances and deposits as well as higher interest rates which more than compensated for the narrowing of interest margins caused, in part, by the introduction of new products. Lending growth reflects mainly the increasing demand for loan financing among corporate customers and home owners' appetite for mortgage loans. The 13% increase in deposits was the result, among other things, of the successful launch of

two new types of high-interest current account, with total deposits of DKr25bn.

Net fee income earned in the first half of 2007 was down 9%, primarily due to the slowdown in the housing market and the extraordinarily high level of issuance fees received in the first half of 2006.

Operating expenses rose 5% on the level recorded in the first half of 2006, mainly as a result of the expenses relating to the further development of the Group's IT systems and the integration of Danske Bank Denmark and BG Bank. The cost/income ratio, excluding integration expenses, was unchanged at 51%.

Total lending rose 16% on the level recorded in the first half of 2006. Lending to retail customers increased 17%, while lending to corporate customers increased 15%. Over the past six months, growth in retail lending has declined, whereas lending growth in the corporate segment has increased.

Total deposits rose 13% on the figure recorded in the first half of 2006. Deposits made by retail customers grew by 9%, while deposits made by corporate customers saw an increase of 19%.

In the first half of 2007, Danske Bank launched a number of new product packages targeting customers who use the Group's online self services and ATMs. These customers are now offered all the advantages of the Group's self-service options, the services of its wide branch network and 24/7 telephone services. Furthermore, the packages make nearly all day-to-day banking transactions free of charge and offer low borrowing rates and attractive deposit rates. The customers welcomed the new products, and more than 50,000 customers had started using their packages by the end of June 2007.

The market share of Banking Activities Denmark was 27.3% for lending and 31.4% for deposits. Since the introduction of the product packages and the high-interest current accounts, the Group has maintained its share of the market.

As a result of its decision to merge the activities of BG Bank and Danske Bank Denmark, the Group closed 31 branches in Denmark – 7 Danske Bank branches and 24 former BG Bank branches. These were branches that were located very close to other of the Group's branches. Customers are still served by the advisers they know – only now from the continuing branches.

The merger of the two brands proceeds better than was initially expected. Together with local management, the Group has identified other branches that would benefit if merged. Therefore, it has been decided to merge around 50 branches into 25 branches in the second half of 2007.

Integration costs are expected to total Dkr275m, of which some Dkr250m is expected to be incurred in 2007. The Group expects to be able to obtain total synergies of Dkr300m, with synergies in 2007 accounting for around Dkr135m and full accounting effect from 2008.

The healthy economic climate in Denmark is expected to continue throughout 2007, although with growth rates lower than in 2006. The Group expects the increase in interest rates and fierce competition to continue.

Banking Activities Finland

Banking Activities Finland encompasses the banking activities of Sampo Bank in Finland and Danske Bank's Helsinki Branch. Sampo Bank, which is the third-largest bank in Finland, caters to retail customers, small and medium-sized businesses and institutional clients. Sampo Bank has 123 branches in Finland and around 2,100 employees.

Comparative figures include the Sampo Bank group as of February 2006.

- Profit before credit loss expenses down 39%
- Profit before credit loss expenses, excl. total integration expenses, up 6%
- Growth in lending of 9%
- Growth expected to continue

The economic climate in Finland remained favourable in the first half of 2007.

Net interest income rose 6% to DKr1,356m on the level recorded in the first half of 2006. The upward trend reflects growth in lending and higher interest rates, which more than compensated for the pressure on lending margins and the accrual of the DKr77m fair value adjustment of loans, advances and deposits in the opening balance sheet at February 1, 2007. Excluding the accrual of the fair value adjustment, net interest income rose 12%.

Operating expenses rose 36% over the level recorded in the first half of 2006, reflecting total integration expenses deriving from the acquisition of the Sampo Bank group. Excluding total

integration expenses, operating expenses rose 4% on the level recorded in the first half of 2006. The cost/income ratio, excluding total integration expenses, improved marginally from 57.7% in the first half of 2006 to 57.2% at the end of June 2007.

Lending rose 9% on the figure recorded in the first half of 2006. Lending to retail customers grew 12%, whereas lending to corporate customers increased 6%. Deposits rose 2% on the figure recorded in the first half of 2006. Deposits made by retail customers increased 3%, whereas corporate deposits grew 1%. The market share of Banking Activities Finland was 15.7% for lending, against 16.0% at June 30, 2006. The market share for deposits was 12.7%, against 13.8% at end-June 2006.

Integration expenses are expected to rise in the second half of 2007 as the migration process proceeds. The growth of Banking Activities Finland is expected to continue in 2007 provided that economic conditions are favourable.

Banking Activities Sweden

Banking Activities Sweden encompasses the banking activities of Östgöta Enskilda Bank and Provinsbankerne in Sweden, which serve all types of retail and corporate customers. Banking Activities Sweden has four regions with 59 branches, four finance centres and around 920 employees. Real-estate agency business is carried out primarily through the 75 offices of Skandia Mäklarna.

- Profit before credit loss expenses up 38%
- Lending growth of 15%
- Introduction of the Sparkonto XL savings product
- Higher return

Banking Activities Sweden recorded healthy growth and higher market shares in the first half of 2007.

Net interest income rose 21% on the same period a year ago. The increase reflects the growth in lending and deposits, and higher market rates despite the narrowing of interest margins.

The trend in net fee income was positive in the first half of 2007, with an increase of 12% on the level recorded in the first half of 2006. The upward trend was the result of a higher number of equity trades and payment transactions, and the considerable inflow of new customers.

Operating expenses grew 7% on the level recorded in the first half of 2006. This rise reflects primarily increased expenses for the launch of new products and expenses for the streamlining of the loan process for home financing. The cost/income ratio improved from 60.3% in the

first half of 2006 to 54.2% in the first half of 2007.

Growth in lending continued at a rate of 15% in the first half of 2007. Lending to retail customers rose 15%, whereas lending to corporate customers grew 14%.

Deposits rose 15% on the figure recorded in the first half of 2006. Corporate deposits were up 9%, whereas deposits made by retail customers increased 28%. The launch of the Sparkonto XL savings product in May 2007 prompted 15,000 customers to deposit SKr2.2bn.

The market share of lending of Banking Activities Sweden was 5.7%, up from 5.5% at the end of June 2006. The market share of deposits was unchanged at 4.4%.

The organisational adjustments and the expansion of the Swedish branch network in recent years are expected to make Banking Activities Sweden well prepared for further profitable growth again in 2007. These expectations are also supported by generally favourable economic trends.

Banking Activities Norway

Banking Activities Norway encompasses the banking activities of Fokus Bank in Norway. Fokus Bank serves all types of retail and corporate customers. Banking Activities Norway has five regions with 55 branches, five finance centres and around 1,100 employees. Real-estate agency business is carried out through the 40 offices of Fokus Krogsveen Nylander.

Cost/income ratio, %	61.2	64.9		59.6	62.8	64.7	63.6	62.0	64.5

- Profit before credit loss expenses up 31%
- Lending growth of 22%
- Fokus Bank – a division of Danske Bank as of April 1, 2007

Banking Activities Norway recorded persistently strong growth and higher market share in the first half of 2007. In March 2007, the unit sold off five branches. The quarterly pre-tax profit of the branches in 2006 amounted to around DKr5m as a result of income of DKr10m and expenses of DKr5m. The profit on the sale of DKr199m was recognised as income under Other Areas.

Net interest income rose 17% on the income recognised in the first half of 2006, reflecting the growth in lending. This increase was achieved in spite of the narrowing of margins on loans to retail customers and the sale of branches.

Net fee income rose 8% on the first half of 2006. This growth was the result of strong activity in savings and investment services and increased corporate business.

Other income increased by 34% to DKr172m in the first half of 2007. The positive trend reflects the increase in income from Fokus Bank's real-

estate agency business, including Nylander, the Norwegian real-estate agency chain acquired in the summer of 2006.

Excluding expenses incurred by Nylander, operating expenses rose by 6% on the level recorded in the first half of 2006. The cost/income ratio improved from 64.9% in the first half of 2006 to 61.2%.

Lending rose 22% on the first half of 2006. Adjusted for the effect of the sale of branches, lending rose 25%, primarily as a result of the growth in lending to corporate customers.

Deposits increased 29% on the same period a year ago. Adjusted for the effect of the sale of branches, deposits rose 32%, owing mainly to the growth in corporate deposits.

The market share of lending of Banking Activities Norway was 5.5%, up from 5.2% at the end of June 2006. The market share of deposits rose to 4.8% from 4.1% a year earlier.

The healthy economic climate in Norway is expected to continue throughout 2007, and this creates the basis for further profitable growth.

Banking Activities Northern Ireland

Banking Activities Northern Ireland encompasses the banking activities of Northern Bank, which serves both retail and corporate customers. Banking Activities Northern Ireland has four regions with 95 branches and around 1,300 employees.

BANKING ACTIVITIES NORTHERN IRELAND (DKr m)	First half 2007	First half 2006	Index 07/06	Q2 2007	Q1 2007	Q4 2006	Q3 2006	Q2 2006	Full year 2006

- Growth in lending of 12% in local currency
- Realisation of synergies as planned
- Significant improvement in return, excluding total integration expenses

The pre-tax result of Banking Activities Northern Ireland amounted to a loss of DKr18m in the first half of 2007, against a loss of DKr204m in the first half of 2006. Income rose 9% to DKr1,194m.

Net interest income grew 10% as a result of increases in deposits and lending as well as higher interest rates. Net fee income rose 5% on the first half of 2006.

Operating expenses fell 7% compared with the level recorded in the first half of 2006. Integration expenses rose DKr161m from the first to the second quarter of 2007, primarily owing to severance expenses. The severance agreements will ensure that the unit will have achieved the planned cost synergies by the end of the year. By the end of 2007, the headcount will have

been reduced by 25% since the acquisition in 2005. As a result of the realised cost synergies, operating expenses, excluding total integration expenses, rose a modest 1%. The cost/income ratio, excluding total integration expenses, improved from 67.3% to 62.3%.

Banking Activities Northern Ireland realised annualised synergies of DKr108m in the first half of 2007. Since the acquisition, the Group has achieved annualised synergies of DKr269m.

Lending, measured in local currency, rose 12% on the figure recorded at the end of June 2006. Disregarding short-term lending to the public sector, the increase was 15%.

Deposits, measured in local currency, rose 9% on the figure recorded at the end of June 2006. Disregarding short-term deposits made by the public sector, the increase was 14%.

Economic growth in Northern Ireland is expected to be favourable again in 2007. This, together with achieved synergies, creates the basis for further profitable growth.

Banking Activities Ireland

Banking Activities Ireland encompasses the banking activities of National Irish Bank, which caters primarily to retail and corporate customers. Banking Activities Ireland has four regions with 61 branches and around 650 employees.

BANKING ACTIVITIES IRELAND (DKr m)	First half 2007	First half 2006	Index 07/06	Q2 2007	Q1 2007	Q4 2006	Q3 2006	Q2 2006	Full year 2006

- Profit before credit loss expenses up DKr231m
- Growth in lending of 51%
- Substantial inflow of new customers
- Realisation of synergies as planned
- Branch network expansion in progress

The pre-tax result of Banking Activities Ireland amounted to a profit of DKr95m in the first half of 2007, against a loss of DKr129m in the first half of 2006. Income rose to DKr689m, up 33%.

Net interest income grew 31% as a result of significant increases in deposits and lending as well as higher interest rates.

Net fee income grew 48% and net trading income rose 15% as a result of higher revenue from cross selling and increased wealth management income.

Operating expenses declined 10% on the first half of 2006. Integration expenses rose DKr20m from the first to the second quarter of 2007, primarily owing to severance expenses. Excluding total integration expenses, operating expenses rose a modest 1% as a result of the synergies

achieved. The cost/income ratio, excluding total integration expenses, improved from 82.7% in the first half of 2006 to 63.1% in the first half of 2007.

Despite a 158% increase in lending since the acquisition in 2005, the headcount has been reduced by 11%. Since the acquisition of National Irish Bank, the Group has achieved annualised synergies of DKr48m.

Lending rose 51% on the figure recorded at the end of the first half of 2006. Lending to retail customers was up 35%, due to the launch of a new type of low-risk mortgage loan, among other things, and lending to corporate customers grew by 65%.

Deposits rose 32% on the figure recorded at the end of June 2006. Deposits made by retail customers grew by 25%, while deposits made by corporate customers saw an increase of 43%.

Economic growth in the Republic of Ireland is expected to slow a little in 2007, although it is still likely to outperform average European growth.

Banking Activities Baltics

Banking Activities Baltics encompasses the Group's banking activities in Estonia, Latvia and Lithuania, which serve all types of retail and corporate customers. Banking Activities Baltics has 41 branches and around 1,200 employees.

BANKING ACTIVITIES BALTICS (DKr m)	First half 2007	First half 2006	Index 07/06	Q2 2007	Q1 2007	Q4 2006	Q3 2006	Q2 2006	Full year 2006

Comparative figures include the Sampo Bank group as of February 2006.

- Profit before credit loss expenses up 75%
- Growth in lending of 56%
- Improved cost/income ratio

Income rose 47% to DKr316m on the level recorded in the first half of 2006. The increase reflects the very high level of activity.

Net interest income rose DKr90m to DKr233m on the level in the first half of 2006, owing to significant growth in lending.

Operating expenses rose to DKr183m, up DKr44m on the figure recorded in the first half of 2006. This increase was also the result of the higher level of activity. The cost/income ratio improved from 64.7% in the first half of 2006 to 57.9% in the first half of 2007.

Lending rose 56% on the same period a year ago. Lending to retail customers grew 71%, whereas lending to corporate customers increased 44%.

Deposits rose 24% on the same period a year ago. Retail customer deposits were up 23%, whereas corporate customer deposits rose 25%.

The strong growth of Banking Activities Baltics is expected to continue in the second half of 2007, although at a slightly lower pace than in 2006 as a result of the macroeconomic climate.

Other Banking Activities

Other Banking Activities comprises the activities of Nordania Leasing and the Group's banking activities in Germany and Poland.

OTHER BANKING ACTIVITIES (DKr m)	First half 2007	First half 2006	Index 07/06	Q2 2007	Q1 2007	Q4 2006	Q3 2006	Q2 2006	Full year 2006

- Pre-tax profit up 19%
- Upward trend in the business of all units

The pre-tax profit of Other Banking Activities amounted to DKr404m, against DKr339m in the first half of 2006. Profit before credit loss expenses rose DKr72m.

Profit before tax at Nordania Leasing rose 20% from DKr208m to DKr250m. The higher profit on new leases contributed to this increase.

The Group's business activities in Germany and Poland continued to see a positive trend in the first half of 2007. Profit before tax rose 18% from DKr131m in the first half of 2006 to DKr154m in the first half of 2007. In Germany, the increase in profit was the result of significant lending growth, whereas the Group's operations in Poland recorded a generally higher level of activity.

Mortgage Finance

Mortgage Finance encompasses the Danske Bank Group's mortgage finance and real-estate agency business in Denmark. The division markets its financing solutions through Realkredit Danmark, Danske Bank and "home". Real-estate agency business is carried out through "home", which has 199 offices throughout the country.

Cost/income ratio, %	31.8	33.2		32.1	31.5	28.7	29.8	33.3	31.1

- Profit before credit loss expenses up 7%
- 5% growth in lending, measured at fair value
- Decline in gross lending

The first six months of 2007 were characterised by an increase in interest rates. This trend led to a lower level of activity in the mortgage credit market.

Profit before tax rose 2% from DKr1,264m in the first half of 2006 to DKr1,293m in the first half of 2007.

The 7% rise in net interest income resulted from the rising interest rates and larger administration margins due to a larger loan portfolio.

Net fee income amounted to a negative DKr167m in the first half of 2007, against a negative DKr114m in the first half of 2006. This decline reflects the increase in portfolio-based fee rates charged by the Group's banking operations for mortgage loans arranged through them.

Operating expenses remained stable at the level recorded in the first half of 2006. The cost/income ratio improved from 33.2% in the first half of 2006 to 31.8% a year later.

Mortgage loans rose DKr27bn to DKr600bn on the level recorded in the first half of 2006. The outstanding nominal bond debt increased by DKr39bn to DKr625bn. The average loan-to-

value ratio fell from 57% at the end of June 2006 to 53% a year later.

Gross lending amounted to DKr188bn in the first half of 2007, down 17% on the level recorded in the first half of 2006. The downward trend was due primarily to the lower activity in the housing market.

The market share of the loan portfolio was 32.2% at the end of the first half of 2007, against 32.8% at the end of 2006. Realkredit Danmark's share of gross lending stood at 25.4% in the first half of 2007, against 29.7% in 2006. The market share of net new lending was 24.3% in the first half of 2007, against 28.7% in 2006.

The rise in interest rates in the first half of 2007 meant that borrowers with 4% fixed-rate loans could profit from refinancing to a higher coupon assuming that interest rates will subsequently fall again. The players in the Danish market have issued varying recommendations. Realkredit Danmark expects interest rates to continue on a slight upward path and has advised against refinancing to a higher coupon. Refinancing activity and related supplementary borrowing have thus been modest at Realkredit Danmark, and the fall in market share should be seen in this light.

Activity in the mortgage credit market is expected to be slightly weaker in 2007 than in 2006.

Danske Markets

Danske Markets is responsible for the Group's activities in the financial markets. Trading activities include trading in fixed-income products, foreign exchange, equities and interest-bearing securities, providing the largest corporate customers and institutional clients with financial products and advisory services on mergers and acquisitions, and assisting customers in connection with their issue of equity and debt on the international financial markets. Proprietary trading encompasses the Bank's short-term investments. The investment portfolio covers the Bank's strategic fixed-income, foreign exchange, and equity portfolios. Institutional banking includes facilities with international financial institutions outside the Nordic region. Institutional facilities with Nordic financial institutions form part of the Group's banking activities.

Comparative figures include the Sampo Bank group as of February 2006.

- Profit before credit loss expenses higher than expected
- Increased customer activity
- Income up 7%

Profit before tax amounted to DKr2,006m in the first half of 2007, against DKr2,030m in the first half of 2006. Satisfactory income from both Danish and non-Danish units reflects increasing demand for Danske Markets' products, including customised structured products.

In the first half of 2007, the fixed-income markets were characterised by general interest rate increases of about 0.5 of a percentage point, which meant that the relatively flat yield curve was maintained. The profit on equity trading was, to some extent, influenced by increased competition, which led to a fall in fees. Equity trading volume increased on the first half of 2006, and the Danish OMX C20 index rose about 10% in the first half of 2007. The other Nordic stock exchanges in Oslo, Stockholm and

Helsinki saw index increases of 15%, 10% and 11%.

Income from trading activities rose 12% on the first half of 2006.

In view of the market conditions, proprietary trading generated satisfactory income.

Returns on core investments in unlisted shares and shares in companies providing the financial infrastructure in Denmark accounted for most of the investment portfolio income.

Income from institutional banking remained satisfactory, up 9% on the income recorded in the first half of 2006.

Operating expenses grew 18%, reflecting increasing IT development costs and higher performance-based compensation.

Danske Markets' strong activity is expected to continue throughout 2007.

Danske Capital

Danske Capital develops and sells advisory services and asset management products and services, which are offered through the Group's banking operations and directly to businesses, institutional clients and external distributors. Through Danske Bank International in Luxembourg, Danske Capital provides advisory services and asset management services to clients outside the Group's home markets. Danske Capital manages the funds of retail customers and institutional investors and the funds of Danica Pension, Danske Fund, Puljeinvest (pooled investment) and Flexinvest. The division also provides advisory services to Danske Invest and BG Invest. Danske Capital has more than 550 employees, who work at offices in Denmark, Sweden, Norway, Finland, the Baltic countries and Luxembourg.

Comparative figures include the Sampo Bank group as of February 2006.

- Profit up 12%
- Income up 15%
- Business activities expected to continue to grow in 2007

Income at Danske Capital rose 15% to DKr957m, mainly as a result of an increase in income from assets under management. The non-Danish units accounted for 58% of total income.

Operating expenses rose 20%. This increase was due mainly to the expansion of activities outside Denmark, a rising number of employees and increased performance-based compensation.

Danske Capital's market share of unit trust business in the Nordic countries was 10% in the first half of 2007. Denmark and Finland remained Danske Capital's most important markets with market shares of 29% and 17%.

Net sales of asset management products and services were DKr1.4bn in the first half of 2007. Net sales suffered from the sell-back of bond-based investment products.

In Denmark, such transactions amounted to DKr2.4bn. This trend should be seen in the light of the launch of high-interest current accounts by the Group's Danish bank branches. Net sales benefited from the persistent increase in demand for equity-based and mixed products. Net sales by the non-Danish units totalled DKr3.8bn in the first half of 2007.

Net sales of DKr5.4bn in the first half of the year lifted the net present value of capital invested under *Flexinvest Fri*, launched in October 2006, to DKr8.2bn at the end of June.

In spite of volatile securities markets, Danske Capital recorded satisfactory returns on investments in the first half of 2007. The unit trust business saw above-benchmark returns on 63% of the funds sold in Denmark and internationally.

Danske Capital expects the positive trend in its business to continue for the remainder of 2007.

Danica Pension

Danica Pension encompasses the Danske Bank Group's activities in the life insurance and pensions market. Danica Pension targets both personal and corporate customers. Products are marketed through a range of distribution channels within the Danske Bank Group, primarily Banking Activities' outlets and Danica Pension's insurance brokers and advisers. Danica offers two market-based products, Danica Balance and Danica Link. These products allow customers to select their own investment profile, and the return on savings depends on market trends. Furthermore, Danica Pension offers Danica Traditionel. This product does not offer individual investment profiles, and Danica Pension sets the rate of interest on policyholders' savings.

Net income as % p.a. of allocated cap.	27.3	0.8	-	29.4	25.2	44.0	40.1	-8.4	18.5

- Premiums rose to DKr9.1bn
- Booking of risk allowance of DKr526m
- Net income up DKr636m

The positive trend in sales of market-based products continued in the first half of 2007, with a 14% increase in premiums to DKr3.3bn. However, premiums received for traditional products fell as expected. Market-based products now account for 58% of new policies.

Net income from insurance business rose from DKr33m in the first half of 2006 to DKr669m in 2007. The increase was attributable mainly to a higher return on investments, which was sufficiently large to allow the booking of the Group's risk allowance, as opposed to the return achieved in the first half of 2006, because interest rate trends reduced Danica's technical provisions. The Group expects to book its risk allowance for 2007 as a whole, although the allowance may be reduced by fluctuations in the financial markets in particular.

The results of the health and accident business remained unsatisfactory, although they are improving.

Premiums amounted to DKr9.1bn in the first half of 2007, up 4% on the amount received in the first half of 2006. Regular premiums for corporate pension products rose 9%. In Sweden and Norway, premiums fell by DKr0.1bn, mainly as a result of amendments to Swedish tax regulations.

The return on customer funds invested in Danica Traditionel was a negative 0.4% in the

first half of 2007, against a negative 3.7% in the same period last year. The return benefited from the increase in equity prices, whereas increasing interest rates and the uncertainty about the future tax on pension returns from index-linked bonds meant that bonds, incl. derivative financial instruments, yielded a negative return of 4.2%. Equities accounted for 25% of the assets.

The increase in interest rates led to a fall in obligations, which meant that Danica was able to reverse some of the technical provisions previously made. The return on customer funds, including reversed provisions, stood at 2.9% in the first half of 2007.

The collective bonus potential amounted to DKr15.1bn, up DKr1.2bn on the level recorded at end-2006. A 30% fall in equity prices would have reduced the bonus potential by DKr11.6bn and shareholders' equity by DKr1.0bn at end-June 2007. An increase in interest rates of 1.0 percentage point would have reduced the bonus potential by DKr2.7bn and shareholders' equity by DKr0.1bn.

Danica does not expect the investment return on its insurance business in the second half of 2007 to match the high return generated in the first half of the year; therefore overall, net income is expected to fall. The net income, which must be seen in the light of the reduction in capital allocated to the insurance business in 2007, will continue to depend greatly on trends in the financial markets.

Other Areas

Other Areas encompasses unallocated cost of capital, expenses for support functions and the Group's real property activities. Moreover, the area covers the elimination of returns on own shares.

Total Other Areas	-512	-115	-	-279	-233	-367	-206	163	-688

Comparative figures include the Sampo Bank group as of February 2006.

The result before tax amounted to a loss of DKr512m, against a loss of DKr115m in the first half of 2006.

The increase in the cost of capital was attributable to the acquisition of Sampo Bank. The hedging of the credit risk associated with a portfolio of mortgage loans by credit default swaps had an adverse effect on net fee income.

Furthermore, the decline in the result reflects the value adjustment of real property and the closure of the Group's Norwegian pension fund in 2006.

Statement by the management

The Board of Directors and the Executive Board (the management) have reviewed and approved the Interim Report of Danske Bank A/S for the first half of 2007.

The consolidated accounts for the first half of 2007 have been prepared in accordance with IAS 34, Interim Financial Reporting, and the interim accounts of the Parent Company have been prepared in accordance with the Danish Financial Business Act. Furthermore, the Interim Report has been prepared in accordance with additional Danish disclosure requirements for interim reports of listed financial institutions.

In our opinion, the Interim Report gives a true and fair view of the Group's and the Parent Company's assets, liabilities and financial position at June 30, 2007, and of the results of the Group's and the Parent Company's operations and consolidated cash flows for the period starting on January 1, 2007, and ending on June 30, 2007.

Accounting policies

This Interim Report for the first half of 2007 has been prepared in accordance with IAS 34, Interim Financial Reporting, and additional Danish disclosure requirements for interim financial reporting of listed financial institutions.

The Group has not changed its accounting policies from those followed in the Annual Report for 2006. The Annual Report provides a full description of the Group's accounting policies.

The Interim Report has not been reviewed or audited.

Standards and interpretations not yet in force

The International Accounting Standards Board (IASB) has approved a number of international accounting standards and interpretations that have not yet come into force. None of these is expected to materially affect the Group's financial reporting.

Highlights

The calculation of capital allocated to the business areas is based on a rate of 5.5% as opposed to the rate of 6.5% applied before January 1, 2007. This change reduced net interest income generated by the Group's banking activities by DKK158m in the first half of 2007.

Pro forma financial highlights

In November 2006, the Danske Bank Group entered into an agreement to buy all the shares of the Finnish Sampo Bank. The acquisition was approved on January 30, 2007, and effected on February 1, 2007, from which date the Sampo Bank group was consolidated in the accounts of Danske Bank.

Comparative figures in the financial reporting on the activities in Finland, the Baltic countries, Danske Markets, Danske Capital and Other Areas have been restated on a pro forma basis to include the financial results of the Sampo Bank group as of February 1, 2006. Consequently, the report comments on the results of these business areas for the first half of 2007 relative to the pro forma figures for 2006.

The pro forma financial highlights were calculated before the time of acquisition in accordance with the accounting policies of the Sampo Bank group (IFRS).

In the financial highlights of the Group, profit contributed by Danske Markets is recognised as net trading income, and profit contributed by Danica Pension is recognised as net income from insurance business. The reclassification column aggregates the profit contributions. Pro forma highlights include the Sampo Bank group's actual figures as of February 2006. The effect of this restatement is shown in the Pro forma adjustment column.

Notes – Danske Bank Group

Note (DKr m)

2 Acquisition of subsidiary undertakings

In November 2006, the Danske Bank Group made an agreement to purchase the shares of the Finnish Sampo Bank. The purchase was approved on January 30, 2007, and effected on February 1, 2007. The accounts of the Sampo Bank group were consolidated in the accounts of the Danske Bank Group with effect from this date.

Assuming that the Group had taken over the Sampo Bank group with effect from January 1, 2007, the estimated effects on profit and total income would have amounted to increases of DKr162m and DKr506m, respectively. The effect on profit of the consolidation of Sampo Bank from February to June 2007 was an increase of DKr778m.

The table below shows the preliminary breakdown of the purchase price by net assets, identifiable intangible assets, and goodwill.

Goodwill represents the value of the expected profitability of the company acquired which cannot be attributed reliably to individually identifiable assets, including the value of staff, know-how and position in the community as well as expected synergies from the integration into the Danske Bank Group.

The fair value of loans, advances and deposits in the opening balance sheet has been increased by a net amount of DKr308m compared with the carrying amount of these items recognised before the acquisition. The effect of the value adjustment on interest income generated by Banking Activities Finland will be a decrease of DKr171m in 2007 and DKr67m in each of the following four years and an increase of DKr131m in the profit generated by Danske Markets.

The fair value of issued bonds in the opening balance sheet has been increased by DKr77m compared with the carrying amount of this item recognised before the acquisition. This value adjustment will increase the interest income generated by Danske Markets in 2007.

Breakdown of purchase price	Date of acquisition	Fair value of net assets	Goodwill on acquisition	Total acquisition price
Sampo Bank				
- Finland	01.02.2007	11,336	12,854	24,190

	Total liabilities	189,095	187,798
	Net assets acquired	13,021	8,997

The figures were calculated just before the date of acquisition in accordance with the accounting policies of the Sampo Bank group (IFRS). The amounts were translated into Danish kroner at the exchange rate prevailing at the time of consolidation.

3 Contingent liabilities

Owing to its size and business volume, the Danske Bank Group is continually a party to various lawsuits. The Group does not expect the outcomes of the cases pending to have any material effect on its financial position.

A limited number of employees are employed under terms which grant them, if they are dismissed before reaching their normal retirement age, an extraordinary severance and/or pension payment in excess of what they would have been entitled to under ordinary terms of employment.

The Bank is jointly and severally liable for the prior-year corporation tax of companies that were jointly taxed before January 1, 2005.

The Bank is registered jointly with all significant, wholly-owned Danish subsidiary undertakings for financial services employer tax and VAT for which it is jointly and severally liable. Sampo Bank and Danske Bank's Helsinki Branch are registered jointly with Sampo Plc for VAT as regards shared functions in Finland which will not cease until the migration has been completed. Danske Bank, Sampo Bank and Sampo Plc are jointly and severally liable for VAT payable on the shared functions.

The table below shows the guarantees issued, irrevocable loan commitments and other liabilities not recognised on the balance sheet.

GUARANTEES AND OTHER LIABILITIES (DKr m)	June 30, 2007	Dec. 31, 2006	June 30, 2006
Guarantees, etc.	95,119	80,568	81,590
Other liabilities	277,962	260,457	255,622
Total	373,081	341,025	337,212

Accounts - Danske Bank A/S

(DKr m)

The accounts of the Parent Company, Danske Bank A/S, are prepared in accordance with the Danish Financial Business Act and the executive order of the Danish FSA on financial reports of credit institutions, etc. The rules are identical to the Group's valuation principles under IFRS with the exceptions that domicile property owned by the Parent Company is recognised at its estimated fair value and that the corridor method is not applied to pension obligations. Holdings in subsidiary undertakings are valued using the equity method, and tax payable by the undertakings is expensed under Income from associated and subsidiary undertakings. The format of the Parent Company accounts is not identical to the format of the consolidated accounts prepared in accordance with IFRS.

At April 1, 2007, the subsidiaries Fokus Bank ASA, Norway, and National Irish Bank Ltd., Republic of Ireland, were converted into branches of Danske Bank. This conversion meant that the activities in Norway and the Republic of Ireland are now recognised under the individual items of the income statement and the balance sheet rather than under Income from associated undertakings and Holdings in associated undertakings, respectively. This change did not affect the net profit for the period, however, the effect on total assets was an increase of DKr195bn as the full balance-sheet totals for the branches are now recognised. Formerly, only the holdings in the two banks were recognised.

The table shows the differences between the consolidated accounts presented in accordance with IFRS and the data reported to the Danish FSA with respect to net profit and shareholders' equity.

	Profit first half 2007	Profit first half 2006	Equity June 30, 2007	Equity June 30, 2006

Notes to the balance sheet – Danske Bank A/S

Note	(DKr m)	June 30, 2007	Dec. 31, 2006
7	Contingent liabilities		
	Owing to its size and business volume, Danske Bank A/S is continually a party to various lawsuits. The Bank does not expect the outcomes of the cases pending to have any material effect on its financial position.		
	The Bank is jointly and severally liable for the prior-year corporation tax of companies that were jointly taxed before January 1, 2005. With effect from January 1, 2005, joint taxation applies to all Danish group companies. The Bank manages the joint taxation. The Bank is liable only for the tax payable by the Bank itself and amounts received from subsidiaries in payment of the joint corporation tax. The Bank is registered jointly with all significant, wholly-owned Danish subsidiaries for financial services employer tax and VAT, for which it is jointly and severally liable.		
	Guarantees and other liabilities		
	Guarantees, etc.		
	Financial guarantees	10,002	16,116
	Mortgage finance guarantees	44,278	42,484
	Registration and remortgaging guarantees	15,273	15,243
	Other guarantees	148,277	187,412
	Total	217,830	261,255
	Other liabilities		
	Irrevocable loan commitments shorter than 1 year	124,220	140,253
	Irrevocable loan commitments longer than 1 year	118,866	108,241
	Sale with an option to repurchase	-	-
	Other obligations	1,049	724
	Total	244,135	249,218

The consolidated accounts contain additional information about contingent liabilities.

8 Related parties

Danske Bank A/S acts as the bank of a number of related parties. Transactions with related parties are settled on market terms.

Apart from intra-group restructuring, no significant and/or unusual transactions with related parties were made during the period under review.
