RECENT DEVELOPMENTS

In Company Announcements No. 8/2012 and 9/2012 released on 30 May 2012 and 31 May 2012, respectively, Danske Bank A/S announced its recent rating downgrades by Standard & Poor’s and Moody’s Investors Service Ltd. Accordingly the following section titled “Ratings Update” is to be added to the bottom of page 120 in the Base Prospectus:

“Ratings Update

Standard & Poor’s downgrades Danske Bank

Standard & Poor’s Credit Market Services Europe Limited (“**S&P**”) has downgraded the Danske Bank Group by one notch to A-/A-2 (from A/A-1). The outlook has been adjusted upwards, from “negative” to “stable”.

The rating action reflects S&P’s expectation that Danske Bank will continue to see high impairment charges in its Irish banking business as a result of continued weakness in the Irish property market. In addition S&P points out continued challenges for some sectors in Denmark.

Danske Bank takes note of S&P’s downgrades but also of the fact that S&P considers Danske Bank’s business position to be strong and views its liquidity as adequate.

In its financial statements for Q1 2012, Danske Bank announced that it expects additional impairment charges in the DKK 5-7 billion range for National Irish Bank in the period from 1 April 2012 to the end of 2014. At the same time, the commercial and investment property portfolios will be transferred to a new, separate unit of the Group to optimise the value of the portfolio and ensure a controlled winding-up of this part of the loan portfolio.

Moreover, Danske Bank has taken several initiatives to increase income and reduce costs in order to significantly improve earnings and strengthen the capital base.

Moody's downgrades Danske Bank

In the course of a major review of 114 European financial institutions that was announced on 15 February 2012, Moody's Investors Service Ltd. ("**Moody's**") has lowered the Danske Bank Group's ratings.

As part of a series of ratings changes for Danish banks, Moody's reduced Danske Bank's long-term rating from A2 to Baa1 and its short-term rating from P-1 to P-2. The outlook was adjusted upwards, from "negative" to "stable".

In its announcement, Moody's writes that Danish banks generally are operating in a difficult macroeconomic climate and they are heavily dependent on funding from the international money markets. In addition, it is still Moody's opinion that, in comparison with other Nordic and European countries, the Danish state is much less willing to support its banking sector.

Danske Bank takes note of Moody's downgrades but does not understand Moody's very negative view of the Danish banking sector.

Danske Bank notes that Moody's continues to take a very negative view of the level of systemic support in Denmark, among other things.

Danske Bank expects declining losses in the coming years. In addition, the Bank has launched several initiatives to reduce expenses and raise income that will improve earnings significantly and further strengthen the capital base.

The Bank has a strong liquidity base, and with a capital base of DKK 159 billion and a solvency need of DKK 91 billion, the Bank had a very comfortable capital buffer of DKK 68 billion at the end of Q1 2012.
