"Nasdaq Stockholm, Nasdaq Helsinki and Nasdaq Copenhagen (together "Nasdaq Nordic") have announced transfers of securitised derivatives to new market segments

On 15 September 2017, Nasdaq Nordic announced that it is planning to transfer the existing market segment used for warrants and certificates, such as the Securities, to the new First North Multilateral Trading Facilities ("**First North MTFs**") operated by Nasdaq as a result of regulatory changes introduced by Regulation (EU) No. 600/2014 on Markets in Financial Instruments (MiFIR). Following a transitional period, such transfer should be effective by no later than 1 December 2017. If such transfer occurs, Nasdaq Nordic will close the current regulated markets on which the Securities are currently listed and holders of such Securities will be required to have access to First North MTFs in order to continue to trade the Instruments following the transfer. Although it is intended that the First North MTFs will have the same characteristics as Nasdaq Nordic in terms of issuer obligations, member participation rules and trading functionalities, there is no assurance that the transfer to First North MTFs will in fact be effected or that such transfer, or any uncertainty regarding the transfer, will not have an adverse effect on the liquidity or market value of Securities."

It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer may not be aware of all relevant factors and certain factors which it currently deems not to be material may become material as a result of the occurrence of events outside the Issuer's control. The Issuer has identified in the Base Prospectus a number of

In addition, the imposition of exchange controls in relation to any Securities could result in an investor not receiving payments on those Securities; • the market value of Securities will be influenced by factors separate to the creditworthiness of the Issuer; • credit ratings assigned to the Issuer or any of its debt or other securities may not reflect all the risks associated with an investment in Securities and may be lowered, withdrawn or not maintained; • the Issuer is exposed to changing methodology by rating agencies; and • the Securities may not be a suitable investment for all investors. <p>There are also risks related to the structure of a particular issue of Securities, general risks related to a particular issue of Securities and risks related to Securities generally, including:</p>
